144-core fiber optic cable distribution box wall-mounted

Overview

Available for small capacity communication system, wall mounting, reasonable and compact structure. The cabinet is composed of two parts, one links with optical cables for fusion connection between optical cable and fiber pigtail and another links with patch. The ORM 144 optical distribution box is designed for the placement of144 optical connectors in both indoors and outdoors. We no longer actively offer this product. The distribution box may be complemented by a bracket, which enables it to be post-mounted. It acts as a distribution point for fiber-optic cables in a central office, data center, or other communication. Fiber distribution cabinet is used outdoors trunk interface device connecting to the cable and distribution cable,and can provide the connection between backbone cables and wiring cable. High intensity and anti-erosion performance 2. Able to counter abrupt climate change and extreme environment 3. Capacity can be flexibly customized as required 4.
