# The external network switch has fiber optic cable but there s no internet connection

## Overview

This problem usually comes down to one of five things: a bad local network setting, a router or modem issue, DNS failure, an IP address conflict, or a wider ISP outage. The good news is that Ethernet “connected but no internet” is usually fixable without replacing hardware. We have a fibre run, SM, 650 meters, with Level1 dumb switches at each end, I get Link lights at both ends, but there's no network traffic. Switch B is on the remote end, 3. When a switch fails, it's crucial to determine which layer of the OSI model the problem originates from to effectively troubleshoot and resolve the issue. They efficiently manage data traffic by forwarding data packets to their intended destinations. However, users may encounter difficulties. Your fiber optical network terminal (ONT), modem, or gateway provides LEDs letting you know the status of your internet (wide area network, or WAN) and home network (local area network, or LAN) connections.

## Article Content

Link but no connection with fibre, where to next?

Because devices connected to Switch A are still getting DHCP and the Link light is on for the SFP port, Switch A hasn''t been replaced yet.

Network Switch Troubleshooting Guide: Common Problems and

A comprehensive switch troubleshooting from the physical layer to the data link layer to the network layer to find out why your network switch is not working.

Why Can''t I Connect To The Internet Through A Network Switch?

Having trouble connecting to the internet through a network switch? Learn about common issues and troubleshooting tips from our comprehensive guide.

No Internet Connection? How to Troubleshoot Internet Issues

Got no internet? Find solutions in our guide for fixing internet and Wi-Fi connection issues.

Fiber Network Troubleshooting – Common Issues & Fixes

Learn how to troubleshoot fiber networks. Identify common issues like high loss, dirty connectors, and signal drops, with practical solutions for optical links.

Fix Ethernet Showing No Internet Access But Connected – Full Guide

The good news is that Ethernet “connected but no internet” is usually fixable without replacing hardware. Work through the steps below in order, starting with quick checks and moving

Fiber Network Troubleshooting Guide: Common Issues and Solutions

“To troubleshoot fiber network issues, start by inspecting physical connections, testing signal strength, and verifying device functionality. Use OTDR for advanced diagnostics and resolve ...

Troubleshoot Fiber Links on Catalyst 9000 Series Switches

This document describes how to troubleshoot fiber optic interfaces by addressing some of the fiber optic module and cabling specifications.

Network Switch Troubleshooting: Common Issues and Solutions

In this guide, we will delve into common network switch problems and provide practical solutions to keep your network up and running.

Ethernet connection identified, but no internet access

*© 2026 CGWEB NETWORK INFRASTRUCTURE - All rights reserved*

Earlier today the router got unplugged and plugged back in, and stopped working for a bit, but we fixed it and the wifi works again. However, my PC is connected to the router via ethernet

Optical fiber connector

An optical fiber connector is a device used to link optical fibers, facilitating the efficient transmission of light signals. An optical fiber connector enables quicker

The FOA Reference For Fiber Optics

Fiber optic joints or terminations - where cables are terminated - are made two ways: 1) connectors that mate two fibers to create a temporary joint and/or connect the fiber to a piece of network gear (left) or

Telecommunications

The physical limitations of metallic media prompted the development of optical fibre. The Internet, a technology independent of any given medium, has
