All lights on the HPE fiber optic switch are on

Overview

Problems with the switch hardware and software are indicated by flashing the Fault and other switch LEDs. For a description of the LED behavior and information on using the LEDs for troubleshooting, see the installation guide shipped with the switch. Check the network. Use these approaches to diagnose switch problems: Each switch port has a Link LED that should light whenever an active network device is connected to the port. The following tables identify the specific. The switch Fault LED will be blinking simultaneously. * The blinking behavior is an on/off cycle once every 1. Port LED View Select Button and Indicator LEDs To optimize the amount of information that can be displayed for each of the switch ports without overwhelming you. I recently bought a second hand switch, a HP ProCurve 1810G-24, however the power, fault & location lights are all on and flashing at a speed that is almost consistently lit. HPE Switch Gigabit Fiber Modules: Access product support documents and manuals, software.
