Aluminum Alloy Cable Trays from Japan

Overview

Japan Aluminium Cable Tray Systems Market Size: DemandThe Japan Aluminium Cable Tray Systems market offers substantial growth prospects driven by infrastru.

Key Takeaways

Japanese aluminum alloy cable trays, such as the LQJ series, are lightweight, corrosion-resistant, and available in ladder, trough, and tray types with flexible installation and high load capacity.

Material and Corrosion Resistance

Japanese aluminum alloy cable trays are made from high-quality aluminum alloys with excellent corrosion resistance, achieved through a natural oxide layer (alumina) that protects against atmospheric and industrial environments. These alloys are selected for mechanical strength, hardness, and resistance to stress corrosion, cracking, and pitting. The lightweight nature of aluminum also facilitates easier handling and installation compared to steel trays.

Structural Types

The LQ

J series offers three main types of cable trays: Ladder Type (T): Features two longitudinal side rails connected by transverse rungs, providing excellent ventilation for cables but limited dust and interference protection. Trough Type (C): Enclosed design that is dustproof and interference-proof, suitable for sensitive control or communication cables. Tray Type (P): Solid-bottom design for general cable support, offering a balance between ventilation and protection.

Dimensions and Load Capacity

Standard tray length: Up to 6 meters; longer lengths available on special order. Load capacity: Varies by type and cross-sectional design; ladder and trough types are engineered for high load-bearing while maintaining a compact structure. Side rails: Typically C-channel profiles for ladder trays, providing rigidity and vibration resistance.

Installation Features

Lightweight aluminum allows for easier installation and handling. Modular design supports flexible construction and future cable additions or modifications. Swaging or bolted connections ensure strong mechanical and electrical continuity.

Zero tangent fittings reduce space requirements when parallel trays are installed close together.

Standards and Certification

Japanese aluminum alloy cable trays are designed to meet international standards, often equivalent to American material standards, and comply with UL, CSA, and NEMA VE-1 classifications. This ensures safety, reliability, and compatibility with industrial and commercial electrical systems.

Applications

These trays are widely used in factories, ships, offshore platforms, and other industrial environments where standardized, safe, and efficient cable management is required. Their combination of high load capacity, corrosion resistance, and flexible installation makes them suitable for both power and communication cabling.

Japan Aluminium Cable Tray Systems Market Size: Demand

The Japan Aluminium Cable Tray Systems market offers substantial growth prospects driven by infrastructure modernization, technological innovation, and regulatory support.

Cable Tray Manufacturers & Suppliers in Japan | Trademo

Find and discover Cable Tray manufacturers and suppliers for all products in Japan, featuring details on their shipment activities, trade volumes, trading partners, and more.

Aluminum Cable Tray

© 2026 CGWEB NETWORK INFRASTRUCTURE - All rights reserved

Aluminum Cable Tray systems are lighter than steel cable tray and Certified CSA Cable Tray, UL listed, NEMA and certified. Because of their lighter weight aluminum cable trays are easier to install than

Perforated aluminum alloy cable tray

Discover high-quality perforated aluminum alloy cable tray designed for efficient cable management, offering durability and easy installation. Ideal for enhancing organizational systems in commercial

LQJ Series Aluminum Alloy Cable Trays-Industrial Busbar Trunking ...

The aluminum alloy cable tray, featuring low density and light weight, eases on-site construction and reduces labor intensity. With excellent corrosion resistance, weatherability and aesthetics, it suits

Cable Tray In Japan, Cable Tray Manufacturers Suppliers Japan

Looking to buy a Cable Tray in Japan? Jeetmull Jaichandlall (P) Ltd. is one of the trustworthy Cable Tray Manufacturers in Japan that is here to fulfill all your wire mesh and netting tools needs.

Cable tray□Yashima Denko Co.,LTD.

By mounting them on the walls or ceilings of the factory, they safely hold numerous cables, resulting in a tidy and organized environment. This helps ensure safety

Aluminum I-BEAM Ladder Tray

Our aluminum, I-beam ladder cable trays feature 3-inch tangents and are using connectable with our fittings and accessories. Aluminum ladder cable trays

Cable Trays In Japan

Choose us- one of the prominent Cable Trays Exporters and Suppliers in Japan, for quality, expertise, and reliable cable management solutions. Contact us today to discuss your project requirements and

Japan Aluminium Cable Tray Market Demand and Revenue ...

Executive Summary: Japan Aluminium Cable Tray Market at a Glance The Japan Aluminium Cable Tray market emphasizes efficiency, innovation, and resource optimization,

Cost of french aluminum alloy mesh cable tray Germany

All Companies and suppliers for cost-of-french-aluminum-alloy-mesh-cable-tray Find wholesalers and contact them directly Leading B2B martketplace Find companies now!

Cable Trays Market Size, Share, Growth, Analysis, 2034

Cable Trays Market Size, Share & Trends Analysis Report By Product Architecture (Ladder Cable Trays, Wire Mesh (Basket) Trays, Solid Bottom/Trough Trays), By Material (Steel (Hot-Dip/Pre

Materials for Cable Trays in Corrosive Environments

This comprehensive guide explores the best materials for cable trays in corrosive environments, analyzing options like HDG steel, stainless steel,

Global Metal Cable Trays Market Growth 2026-2032

The upstream raw materials for Metal Cable Trays mainly include steel, aluminum alloy, zinc and surface treatment chemicals, fasteners, and accessory components.

Cable Tray: Material Properties

In determining the proper aluminum alloy for structural applications such as a ventilated cable tray system, the design engineer should recognize the advantages inherent in using alloys that are heat

0 Madagascar Orders Aluminum Alloy Fire Resistant Cable Trays jobs

Today''s top 0 Madagascar Orders Aluminum Alloy Fire Resistant Cable Trays jobs in United States. Leverage your professional network, and get hired. New Madagascar Orders Aluminum Alloy

Low Price Fireproof Aluminum Alloy Cable Tray Durable Lightweight Cable ...

Highlights at a glance High-Strength Aluminum Alloy: Ensures durability and stability during installation. Lightweight Design: Easy to handle and install, reducing labor costs. Wide Compatibility: Suitable for

Trough Cable Trays for PV Solar Installations

Trough Cable Trays for PV Solar Installations Our Cable tray, designed for photovoltaic power plants for safe laying and protection of DC/AC cables. Made of corrosion-resistant materials (e.g. galvanized
