Australian Anritsu Spectrometer

Overview

Utilizing Anritsu's patented nonlinear transmission line (NLTL) technology – the same technology that Anritsu's world-class vector network analyzers use – the 145 GHz and 170 GHz models are the world's first handheld, millimeter-wave spectrum analyzers to provide broadband . Utilizing Anritsu's patented nonlinear transmission line (NLTL) technology – the same technology that Anritsu's world-class vector network analyzers use – the 145 GHz and 170 GHz models are the world's first handheld, millimeter-wave spectrum analyzers to provide broadband . Anritsu supplies test and measurement equipment, supporting next generation networking, as well as quality-assurance inspection equipment for food and pharma. Choose from an extensive selection of signal analyzer products from DC to 44. 5 GHz and extendable to 325 GHz. With excellent total level accuracy, dynamic range and performance, Anritsu spectrum/signal analyzers not only can capture wideband signals but FFT technology supports multifunction signal. The MS2089A comes in two configurations. The latest Generation Anritsu Site Master integrates cutting-edge technology, customer-driven innovation, and decades of expertise in test and. Anritsu is a leading provider of measurement and testing solutions, with a strong reputation for quality and innovation in the industry. Anritsu offers a wide range of products and solutions, including network analyzers, spectrum analyzers, signal generators, power meters, optical test equipment. TechRentals offers Spectrum Analysers available for rent, providing versatile solutions for professionals in telecommunications, broadcasting, research, and various other industries. Your search returned no results. Spectrum Analysers are essential tools for measuring and analysing the frequency. Solve all your measurement needs with Anritsu's wide line-up of signal and spectrum analyzers, ranging from high-performance and multi-function, high-end models for R&D to handheld types for field use. Article Content

Signal/Spectrum Analyzers | Anritsu Asia Pacific

With excellent total level accuracy, dynamic range and performance, Anritsu spectrum/signal analyzers not only can capture wideband signals but FFT technology supports multifunction signal analyses in

Anritsu MS2089A Spectrum Analyser | Av-Comm Space

It seamlessly integrates cable and antenna analysis with spectrum analysis and VNA functionalities, offering a comprehensive testing solution for professionals in

Anritsu Products: Innovative Test & Measurement Solutions

Anritsu offers a wide range of products and solutions, including network analyzers, spectrum analyzers, signal generators, power meters, optical test equipment, microwave components, and more.

Spectrum Analysers Hire | High Frequency Spectrum Analysers

Our Spectrum Analysers category encompasses a diverse selection of advanced instruments, sourced from reputable manufacturers such as Anritsu and Agilent. Our equipment is regularly calibrated and

Signal Analyzer / Spectrum Analyzer Selection Guide

Solve all your measurement needs with Anritsu''s wide line-up of signal and spectrum analyzers, ranging from high-performance and multi-function, high-end models for R&D to handheld types for field use.

All ANRITSU Dealers and Sellers Australia Wide

New release of ANRITSU Dealers around Australia on one place. If you haven''t joined yet, join now, other wise find the rest.

Anritsu Spectrum Master 9 kHz to 44 GHz Ultraportable Spectrum

Utilizing Anritsu''s patented nonlinear transmission line (NLTL) technology – the same technology that Anritsu''s world-class vector network analyzers use – the 145 GHz and 170 GHz models are the

Anritsu Site Master MS2085A and MS2089A Analyzers

Anritsu, a global leader in test and measurement solutions, has unveiled its latest advancements in field testing equipment — the Site Master

Anritsu MS2712E 4GHz Spectrum Analyser w Tracking Gen & GPS

© 2026 CGWEB NETWORK INFRASTRUCTURE - All rights reserved

Manufactured by Anritsu, a global leader in test and measurement solutions, the MS2712E 4GHz Spectrum Analyser combines robust technical capabilities with user-friendly operation. It covers a

MS2721B Spectrum Master Technical Data Sheet

Introduction Anritsu''s high performance handheld spectrum analyzer provides the wireless professional the performance needed for the most demanding measurements in harsh RF and physical

Signal/Spectrum Analyzers | Anritsu Asia Pacific

Explore Anritsu''s lineup of signal and spectrum analyzers, along with valuable resources to support your measurement needs.

Anritsu Products: Innovative Test & Measurement Solutions

Anritsu is a leading provider of measurement and testing solutions, with a strong reputation for quality and innovation in the industry. Anritsu offers a wide range of products and solutions, including

Anritsu | Fibre Optic Testing Solutions At FLUXNET

At FLUXNET, we provide range of Anritsu fibre optic testing products, including OTDRs for efficient network management and detailed fibre analysis.

Signal/Spectrum Analyzers | Anritsu Asia Pacific

Choose from an extensive selection of signal analyzer products from DC to 44.5 GHz and extendable to 325 GHz. With excellent total level accuracy, dynamic range and performance, Anritsu

Anritsu Pty Ltd | Ricketts Road, Mt Waverley, VIC | White Pages®

Connect with Anritsu Pty Ltd at Ricketts Road, Mt Waverley, VIC. Discover phone numbers, directions, web links & more with the White Pages®

Optical Spectrum Analyzer

This analyzer has the dynamic range, reception sensitivity and sweep speed requested by users, backed by Anritsu''s high-level technology. The high sensitivity meets the exacting demands placed

Optical Spectrum Analyzer MS9740A Brochure

The Optical Spectrum Analyzer MS9740A reduces the total time from waveform sweeping to data transfer to external control equipment and supports simple analysis procedures, offering excellent

Solutions | Anritsu Asia Pacific
