

Azerbaijan Tray Cable Tray Standards

Overview

We ensure our cable trays adhere to stringent industry standards, guaranteeing safety and regulatory compliance. We don't just sell cable trays; we provide exceptional service and expertise.

Key Takeaways

Cable trays in Azerbaijan are available in various types, materials, and sizes, including ladder, perforated, and trough designs, compliant with international safety standards.

Types of Cable Trays

Ladder Cable Trays – Ideal for heavy-duty applications, allowing easy cable pulling and excellent ventilation for heat dissipation. Perforated Cable Trays – Feature holes along the tray bottom for improved airflow and drainage, suitable for medium-duty installations. Trough Cable Trays – Solid or partially solid bottoms for supporting smaller cables or sensitive wiring, providing protection from dust and debris.

Materials and Coatings

Galvanized Steel – Durable and corrosion-resistant, commonly used in industrial and outdoor environments. Stainless Steel – Offers high corrosion resistance for harsh or chemical-prone environments.

FR

P (Fiber Reinforced Plastic) – Lightweight, non-conductive, and corrosion-resistant, suitable for specialized applications. Aluminum – Lightweight and resistant to corrosion, often used in commercial installations.

Dimensions and Configurations

Lengths: Typically range from 2,000 mm to 6,000 mm. Widths: From 100 mm up to 900 mm. Flange Heights: 25 mm to 150 mm.

Angles and Radii: Bends from 30° to 90° and radii from 300 mm to 900 mm for flexible routing. Customizable Fittings: Tees, elbows, reducers, and covers are available to tailor installations.

Standards and Compliance

Compliant with ASTM A123, ISO 1461, ANSI/NFPA 70 (National Electrical Code), and NEMA VE 1-2017. UL-certified options are available for safety and reliability. Designed to minimize fire hazards and electrical risks by segregating cables from other building elements.

Installation Features

Open designs for easy cable installation and inspection. Flexible mounting options for walls, ceilings, or underfloor installations. Supports various cable types and sizes, ensuring optimal heat dissipation and mechanical protection.

Local Manufacturers and Suppliers

Jeetmull Jaichandlall (P) Ltd. – Offers a wide range of cable trays with high-quality finishing and customizable options.

AB

B – Provides ladder, perforated, channel, and strut cable trays with medium to ultra-heavy-duty options, supporting both new projects and refurbishments. Other local suppliers provide galvanized, stainless steel, and FRP trays with tailored fittings for industrial, commercial, and construction projects.

Summary

In Azerbaijan, cable trays are available in ladder, perforated, and trough models, made from galvanized steel, stainless steel, aluminum, or FRP, with customizable lengths, widths, and fittings. They comply with international safety standards, offer flexible installation options, and are supplied by both local manufacturers and global brands like ABB, ensuring reliable and efficient cable management for industrial, commercial, and construction applications.
