

Belarusian manufacturer of pressure sensing optical cable systems

Overview

Brugg Cables designs and manufactures a wide range of fiber-optic cables and accessories for distributed strain, temperature, acoustic and pressure sensing, resulting in the optimised monitoring and control of your critical infrastructure. Peleng JSC is a leading design enterprise in optoelectronic industry of the Republic of Belarus. The enterprise has a powerful production and intellectual potential. Nowadays BelOMO Holding is a universal multiproduct organization specializing in the R&D and production of laser, optoelectronic and optomechanical devices and. The Belarusian Optical and Mechanical Organization (BelOMO Holding since 2011) is a recognized leader in optoelectronic device-making. This highly sensitive technology is used for monitoring critical infrastructure such as power cables, pipelines, or railroad tracks.

[Home \[belomo \]](#)

Nowadays BelOMO Holding is a universal multiproduct organization specializing in the R&D and production of laser, optoelectronic and optomechanical devices and systems.

[About us](#)

About BelOMO Holding The Belarusian Optical and Mechanical Organization (BelOMO Holding since 2011) is a recognized leader in optoelectronic device-making. The history of BelOMO Holding springs

Fiber Optic Sensing Cable Solutions.

Brugg Cables is a leading developer, manufacturer and supplier of engineered fiber optic sensing cable system solutions. These sensing cables detect strain, temperature, acoustics / vibration, Rayleigh. or

Distributed Fiber Optic Sensing Solutions | AP Sensing

Based on a proven track record our Distributed Fiber Optic Sensing (DFOS) solutions ensure reliable asset protection even in the most challenging environments. We have established ourselves as the

Distributed Acoustic Sensing (DAS) | C-OTDR | AP Sensing

Distributed Acoustic Sensing (DAS) systems detect strain changes and vibrations along optical fibers. This highly sensitive technology is used for monitoring critical infrastructure such as power cables,

Brugg Cables

Brugg Cables designs and manufactures a wide range of fiber-optic cables and accessories for distributed strain, temperature, acoustic and pressure sensing, resulting in the optimised monitoring

Integrated Technics | Lemt

Our products are exported to more than 35 countries around the world, including the United States, Canada, Sweden, Germany, England, Japan, the Middle East, South-East Asia and Latin America.

About us

Minsk Cable Plant Minskkabel Joint Limited Liability Company is one of the leading manufacturers of cable and wiring products and is specialized in the manufacture of optical cables for an

OJSC «Plant «Optic»

Till the moment the specialization of manufacture has been remained without any changes. The unique optical technologies, equipment and skilled personnel have been preserved.

Distributed optical fiber pressure sensors

The measurement of pressure by using distributed optical fiber sensors has represented a challenge for many years. While single-point optical fiber pressure sensors have reached a solid

Fiber-Optic Pressure Sensors: Recent Advances in

Fiber-optic sensing (FOS) technology has emerged as a cutting-edge research focus in the sensor field due to its miniaturized structure, high

Home [belomo]

The Belarusian Optical and Mechanical Organization (BelOMO Holding since 2011) is a recognized leader in optoelectronic device-making. Nowadays BelOMO Holding is a universal multiproduct

Sensing: Customized Optical Fibers and High Precision

Lightera is a leading manufacturer of optical fibers and cables for demanding sensing applications. Fiber optic sensors detect changes in temperature, strain,

Fiber Optic Sensor Cables for Advanced Monitoring | AP Sensing

Fiber optic sensor cables are the key enabler for real-time monitoring of temperature, strain, and acoustic signals across diverse and challenging environments. Depending on the application and the

Distributed Sensing Cables

Our distributed sensing cables provide optimized monitoring of your critical harsh environment infrastructure. Distributed sensing is a technology that enables continuous measurements along the

Sensor cables with state-of-the-art fiber optic sensors | Solifos AG

With distributed fiber optic sensors, the cable itself is the sensor. This enables reliable, continuous and seamless measurement of temperature, strain, acoustics/vibration, pressure and humidity in a wide

Flow, level, liquid analysis, optical analysis, pressure,

People for Process Automation offer you solutions and products in flow, level, liquid analysis, optical analysis, pressure, temperature measurement, software and

Distributed Fiber Optic Sensing Solutions | AP Sensing

We create the most compelling fiber optic sensing solutions, empowering the world optimize assets, protect lives and the environment.
