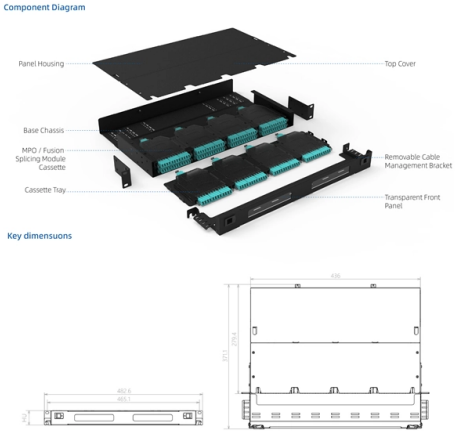
Cable Tray Completion Report



Overview

This work inspection report documents an inspection of the installation of a cable tray at a location on an unspecified date.

Key Takeaways

A Cable Tray Completion Report documents the installation, inspection, and compliance of cable trays, confirming that all work meets project specifications, safety standards, and design requirements.

Purpose

The Cable Tray Completion Report serves to: Verify that all cable trays, ladders, and associated accessories are installed according to approved drawings and specifications. Confirm that materials are inspected, free from damage, and suitable for the project environment. Ensure compliance with safety standards, grounding, bonding, and electrical codes.

Document any deviations, corrective actions, or observations for quality assurance. Key Sections of the Report1.

Project Information

Project name, location, and client details. Reference to approved shop drawings and IFC (Issued for Construction) layouts. Installation dates and responsible personnel.

2.

Material Verification

List of cable trays, ladders, supports, clamps, and accessories. Verification of material quality, corrosion resistance, and compliance with specifications. Documentation of any damaged or rejected materials and corrective actions taken ( ).

3.

Installation Details

Confirmation of proper tray alignment, leveling, and secure fastening. Support spacing, type, and anchoring as per design requirements. Verification of bends, expansion joints, and field bend radii.

Installation of covers, firestoppers, and flexible conduits where applicable ( ). 4.

Safety and Compliance

Confirmation that all personnel used PPE and followed site safety protocols.

Verification of Lockout/

Tagout (LOTO) procedures and hot work permits if required. Compliance with grounding and bonding requirements, including continuity tests ( ). 5.

Inspection and TestingPre-cabling and post-cabling inspections. Verification of spacing between power and instrumentation cables to minimize EMI. Testing of grounding continuity and mechanical integrity of supports.

Documentation of any deviations and corrective measures ( ). 6.

Remarks and Observations

Notes on any site-specific challenges or deviations from the plan. Recommendations for maintenance or follow-up inspections. 7.

Sign-OffSignatures of site engineer, supervisor, and quality control inspector. Date of completion and approval for handover.

Supporting Documentation

Attach inspection checklists, test results, and photographs of installed trays. Include material receiving reports and any deviation reports for completeness ( ). A well-prepared Cable Tray Completion Report ensures project accountability, safety compliance, and readiness for commissioning, providing a clear record for both the client and the construction team.
