Color Classification of 24-Core Indoor Single-Mode Flexible Optical Cable

Overview

The TIA-598-C sequence: Blue, Orange, Green, Brown, Slate, White, Red, Black, Yellow, Violet, Rose, Aqua. What is the color code for 24-fiber or 48-fiber cables?

The 12-color pattern repeats in groups of 12. Example: 1–12 (blue → aqua), 13–24 (blue → aqua). in up to 24 fibres and have an all-dielectric loose tube construction. It shall be suitable for indoor applications, complying with IEC standards for l w smoke / zero halogen and EuroClass Cca and B2ca for fire protection. These cables consist of 12 to 216 fibers organized into 12-fiber ribbons inside a central tube. Dielectric strength. The Fiber Color Code, defined by the TIA-598 standard, establishes a universal system to identify fibers, connectors, and cables across global networks. By following it. OM3 is a laser-optimized multimode fiber (LOMMF) designed for high-speed networks using VCSELs (Vertical-Cavity Surface-Emitting Lasers). The aqua color (hex: #00B6C1) is instantly recognizable and signals support for 10, 40, or 100 Gb/s over short distances — up to 300 meters at 10G.
