Custom Price List for Drop Fiber Optic Patch Cords

Overview

We can custom build any length and type of fiber you need and we''ll ship the order typically within 1-2 days.

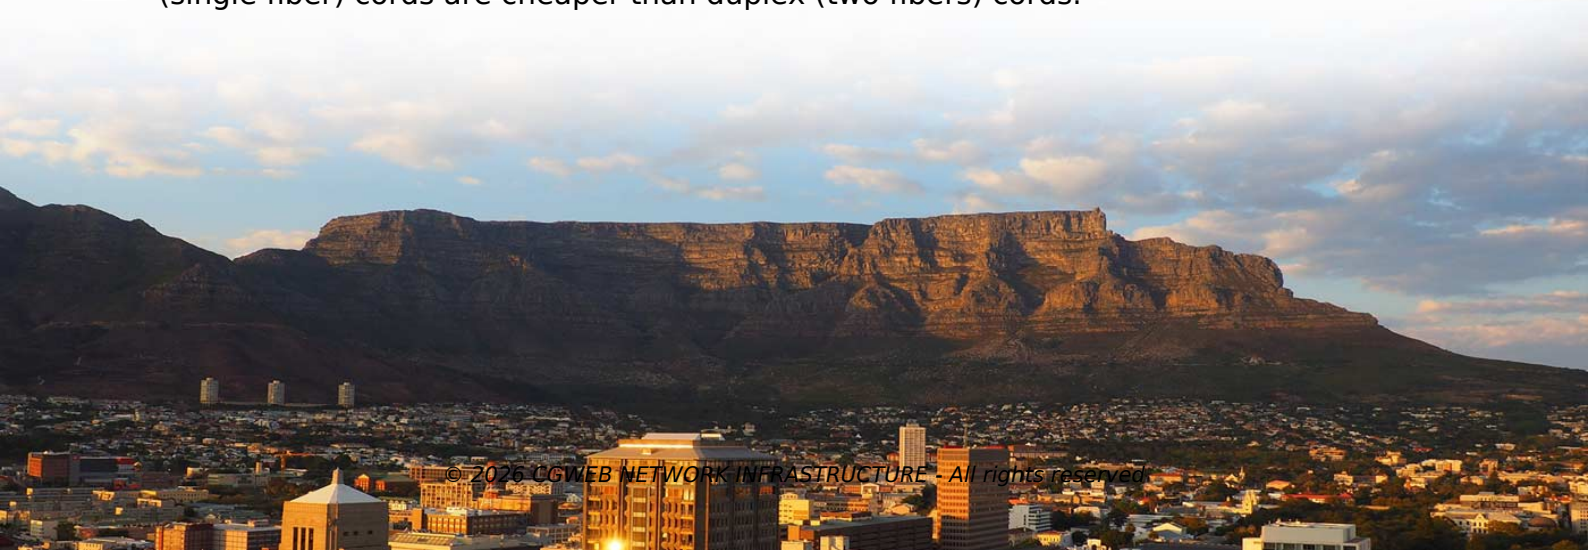

Key Takeaways

The price of custom fiber optic patch cords varies widely depending on fiber type, connector type, length, jacket, and additional specifications, typically ranging from a few dollars to over $50 per unit for specialized configurations.

Factors Affecting Custom Pricing

Fiber Type: Single-mode fibers are generally more expensive than multimode fibers due to their higher precision and longer-distance performance. OM3 and OM4 multimode fibers are commonly used in data centers and can influence cost. Connector Type: Common connectors include LC, SC, ST, FC, E2000, and MPO/MTP.

High-density or specialty connectors like MPO/MTP or E2000® often increase the price due to complexity and precision requirements. Cable Length and Type: Longer cables or armored/low-smoke zero-halogen (LSZH) jackets add to the cost. Simplex (single fiber) cords are cheaper than duplex (two fibers) cords.

Polish Type: UPC (Ultra Physical Contact) and APC (Angled Physical Contact) connectors differ in performance and cost, with APC typically being more expensive due to lower return loss. Customization and Assembly: Custom assembly, pre-terminated cables, or specialty epoxies can increase lead time and cost. Some suppliers, like Thorlabs, offer same-day or expedited manufacturing for standard custom requests, while more complex designs require longer production times.

Quality and Certification: ISO-certified manufacturers or suppliers with RoHS/CE compliance may charge higher prices, but this ensures reliability and low insertion loss, which is critical for high-performance networks. Volume and Bulk Orders: Ordering in bulk can reduce the per-unit cost, while small quantities or one-off custom cables are priced higher due to setup and labor costs.

Typical Price Ranges

Standard multimode patch cords (1–5 meters, LC/SC connectors): $5–$15 per unit. Single-mode patch cords with APC connectors: $10–$30 per unit. High-density or specialty cables (MPO/MTP, armored, long lengths): $30–$50+ per unit.

Recommendations for Sourcing

Request samples to test performance before bulk ordering. Verify technical datasheets, compliance certificates, and warranty policies. Compare suppliers for lead time, customization capabilities, and total cost of ownership, not just unit price.

Consider local vs. international suppliers: Asian manufacturers often offer competitive pricing with ISO-certified production, while U. S. or European suppliers may provide faster delivery and higher quality control. By evaluating these factors, you can determine a custom price tailored to your project requirements while ensuring performance and reliability.
