Do I need a terminal box to get broadband

Overview

Much like your existing broadband connection (if you have one), full fibre broadband requires the use of a router and an additional connection box. Both of these devices need to be plugged in to work and we ask that the power sockets are close to your fibre entry point. Do I need a router with an ONT box?

Yes. The ONT on its own doesn't provide Wi-Fi or a usable internet connection. The router then distributes the internet signal around your home, either wirelessly or via additional. If you're a landlord of a single dwelling unit (such as houses, bungalows, and individual properties) this page will explain what you need to know about broadband installation, property benefits, and long-term investment value. Installation process: Step-by-step overview of Full Fibre installation. There are two pieces of equipment you'll need to get your service working on your activation date. What do the lights on the Openreach fibre. You'll typically find an Optical Network Terminal (ONT), or fiber box, in a central part of your home, like on the outside of your home, in your garage or even in a closet, and it plays a vital role in bringing fiber internet to your household via your internet service provider.
