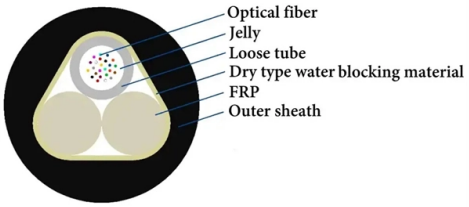
E4418b Optical Power Meter



Overview

The E4418B single channel, power meter is compatible with all 8480 and E-series sensors (except the E9320 family), and provides average power measurements from -70 to +44 dBm, 9 kHz to 110 GHz. E4418B/E4419B EPM Series Power Meters, E-Series and 8480 Series Power Sensors Keysight Technologies E4418B/E4419B EPM Series Power Meters, E-Series and 8480 Series Power Sensors Data Sheet Why Keysight's power meters and sensors?

Reliable, high-performing solutions Every power meter and sensor. The E4418B power meter is designed for bench and automatic test equipment (ATE) use. Need to connect this instrument to your PC?

E4419B recorder outputs are dedicated to channel A and channel B. Remote input/output: A TTL logic level is output when the measurement exceeds a predetermined limit. TTL inputs are provided to initiate zero and calibration cycles. Option 002 rear parallel sensor connector RF POWER METER EPM Series. HP SHALL NOT BE LIABLE FOR ANY DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER BASED ON CONTRACT, TORT, OR ANY OTHER LEGAL THEORY. For continued protection against fire hazard, replace the line fuse (s) only with fuses of the same type and rating (for example, normal blow. Agilent Technologies further certifies that its calibration measurements are traceable to the United States National Institute of Standards and T echnology, to the extent allowed by the Institute's calibration facility, and to the calibration facilities of other International Standards Organization.
