Estonia Solution High-Speed Optical Connectivity 100G

Overview

Telia Eesti of Estonia has deployed the FSP 3000 from ADVA Optical Networking to upgrade its national backbone network to 100-Gbps capabilities, according to the optical transport systems company. One of the largest telecommunication providers in the Baltic states, Telia Eesti is using the ADVA FSP 3000 solution, complete with multi-degree ROADMs, to link. Ribbon Communications Inc., a global provider of real time communications technology and IP optical networking solutions to many of the world's largest service providers, enterprises, and critical infrastructure operators to modernize and protect their networks, announced the deployment of a state. Nokia and Elisa become first in Europe to trial 100G PON over live fiber broadband network Already deploying the Nokia 10G fiber solution, Elisa is planning to deploy 25G, and beyond.
