Cable Tray Manufacturer Addis Ababa Professional cable tray manufacturing in Addis Ababa, Ethiopia. We produce high-quality cable trays, ladders, and acces.

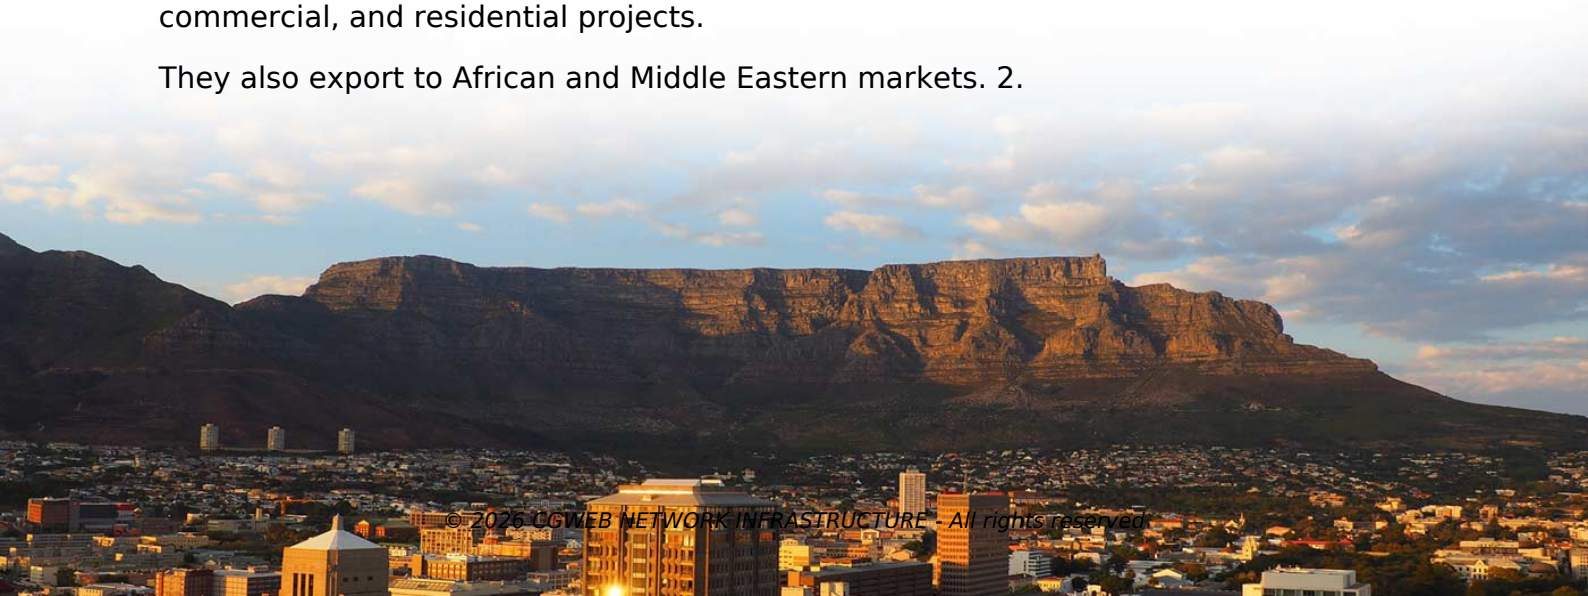

## Key Takeaways

Brilltech Engineers Pvt. Ltd. and NAHMA Precision Metal Products are leading manufacturers of galvanized cable trays in Ethiopia, offering high-quality, customizable solutions for industrial and commercial applications. Key Manufacturers1.

Brilltech Engineers Pvt. Ltd. Brilltech Engineers is a prominent supplier and manufacturer of galvanized cable trays in Ethiopia.

They provide a wide range of products including ladder cable trays, perforated trays, PVC trays, mild steel trays, stainless steel trays, and raceways. Their galvanized cable trays are hot-dip galvanized, offering excellent corrosion resistance and durability suitable for Ethiopia's varied climates. Brilltech emphasizes customization, quality control, and timely delivery, making them a trusted choice for industrial, commercial, and residential projects.

They also export to African and Middle Eastern markets. 2.

### NAHM

A Precision Metal Products Located in Addis Ababa, NAHMA produces high-quality ladder-type and perforated cable trays along with accessories for electrical and industrial applications. They focus on professional manufacturing standards and provide custom solutions tailored to client requirements, ensuring compliance with local and international standards. Market ContextEthiopia's cable tray market is growing rapidly due to infrastructure projects, industrial parks, and energy sector expansion, including the Grand Ethiopian Renaissance Dam.

Hot-dip galvanized steel remains the preferred material for most regions due to its corrosion resistance, while stainless steel and aluminum alloys are used in high-alkali or coastal areas. Local manufacturing is limited, with over 85% of cable trays imported, primarily from China, India, and Turkey, but companies like Brilltech and NAHMA are expanding domestic production.

### Standards and Compliance

Cable tray installations in Ethiopia must comply with ESA SES 501: 2015 for structural safety and ET-NFC 2015 for fire codes. Steel trays require a minimum thickness of 1. 5mm, and grounding continuity testing per IEC 61537 is mandatory.

Galvanized trays require bi-annual inspection for zinc wear, with recoating recommended after 15–20 years. Choosing a SupplierWhen selecting a galvanized cable tray manufacturer in Ethiopia, consider: Material quality (hot-dip galvanized steel for general use, stainless steel for corrosive environments)Customization options (size, length, load capacity)Compliance with ESA and IEC standardsDelivery and after-sales supportExperience with large-scale industrial projects Both Brilltech Engineers and NAHMA Precision Metal Products meet these criteria, offering reliable, durable, and compliant galvanized cable tray solutions for Ethiopian projects.
