FC Fiber Optic Connector Standard

Overview

The following guide systematically describes each connector type to help you make an informed selection for the connector that best suits your fibre-optic networking system.

Key Takeaways

The FC (Ferrule Connector) fiber optic connector is standardized under TIA EIA/TIA-604-4 and IEC 61754-13, designed for high-precision, high-vibration applications.

Overview

The F

C connector is a single-mode fiber optic connector featuring a threaded screw-lock mechanism, which provides a secure, vibration-resistant connection ideal for telecommunications, datacom, and optical test equipment. Originally developed by NTT in Japan during the 1980s, the FC connector uses a 2. 5 mm ferrule made of zirconia ceramic or stainless steel to align the fiber cores precisely.

The threaded coupling nut prevents accidental disconnection and ensures stable optical performance in high-vibration environments. StandardsFC connectors are standardized under: TIA EIA/TIA-604-4 (Fiber Optic Connector Intermateability Standard)IEC 61754-13 (International standard for FC connectors) These standards define the mechanical dimensions, ferrule tolerances, and intermateability requirements to ensure consistent performance across manufacturers. Polish TypesFC connectors are available in different polish types, which affect return loss and insertion loss: FC/PC (Physical Contact): Standard convex polish for low back-reflection.

FC/SPC (Super Physical Contact): Higher polish quality for reduced insertion loss. FC/UPC (Ultra Physical Contact): Ultra-polished for minimal back-reflection. FC/APC (Angled Physical Contact): Ferrule end-face angled at 8° to reduce back-reflection, commonly used in high-precision or analog applications.

Key Features

Threaded coupling: Provides secure, vibration-resistant connections. Ferrule alignment: 2. 5 mm ceramic ferrule ensures precise fiber core alignment.

Tunable versions: Some FC connectors allow ferrule rotation to optimize insertion loss. Applications: Widely used in single-mode lasers, measurement equipment, and polarization-maintaining fibers.

While LC and S

C connectors are more common in modern data centers, FC remains standard in test equipment and high-vibration environments.

Summary

The F

C fiber optic connector is a high-precision, threaded connector standardized under TIA EIA/TIA-604-4 and IEC 61754-13, available in multiple polish types (PC, SPC, UPC, APC) to suit different optical performance requirements. Its secure screw-lock design and precise ferrule alignment make it ideal for telecom, datacom, and optical test applications, particularly where vibration resistance and low back-reflection are critical.

FC Connector Standards

The FC/PC (Physical Contact) and FC/APC (Angled Physical Contact) fiber optic connectors are standardized under TIA EIA/TIA-604-4 and IEC 61754

LC vs SC vs FC vs ST: A Complete Fiber Optic Connector Guide

The following guide systematically describes each connector type to help you make an informed selection for the connector that best suits your fibre-optic networking system.

FC Connector | Precision Fiber Optic with ACA

The FC connector by DIAMOND SA is a robust, high-precision fiber optic solution with threaded coupling and ACA technology for low-loss, vibration-resistant

FC Series

The FC connector is a fiber optic connector with a screw thread locking mechanism to withstand high-vibration environments Radiall''s FC connector is composed of a plated nickel housing and a 2.5 mm

FC Fiber Connector — Specs, Polish Types & Uses | CZT

The FC connector is a mature, reliable single-mode fiber connector with a threaded screw-lock coupling that provides excellent vibration resistance and consistent angular alignment.

Fiber Connectors

Key performance characteristics for selecting a connector are discussed, including the insertion loss (attenuation), return loss (reflection loss), and the number of

Fiber Connector Types: A Comprehensive Guide 2025

Among these components, fiber connector types are essential to network performance, reliability, and scalability. This guide will walk you through

IEC Fiber Connector Standards for Optical Networks

Overview of IEC fiber connector standards covering interface types, endface geometry, and performance requirements for FTTH and data center

Understanding Fiber Connector Types ST SC LC FC

When working with fiber optic technology, you''ll frequently encounter terms like SC UPC, LC UPC, SC APC, LC APC, FC APC, and FC UPC. These designations

Fiber Optic Adapter Guide: Types, Tips & Solutions

Most follow standard connector dimensions (LC, SC, FC), allowing basic interoperability. However, for critical applications, using adapters and

Fiber Connector Types: Lc Vs Sc Vs St Vs Fc — Which

Compare LC, SC, ST and FC fiber connectors by form factor, insertion loss, durability and best use cases. Clear guidance for data center, FTTH, industrial

CVI 1080P+ TTL over Fiber Converter Optical Transceiver for Drone

Descriere CVI 1080P+ TTL over Fiber Converter Optical Transceiver for Drone 20KM FC Fiber Optic Connector UART TTL SBUS Fiber Optics: Fiber Interface: FC/UPC Fiber Wavelength:

Fiber Optic Connector Types: A Beginners Guide

The fiber connector types, sometimes referred to as terminations, link fiber optic cables together through terminals, switches, adapters, and patch

Single Mode FC/PC Fiber Optic Patch Cables

Thorlabs offers single mode patch cables with FC/PC connectors on both ends. Each cable is manufactured in our facility on state-of-the-art equipment. Available from stock, these cables feature

Everything you need to know about fiber optic termination

Different connectors and splice termination procedures are used for singlemode and multimode connectors, so make sure you know what the fiber will be before you specify connectors or splices!

Single-mode optical fiber

In fiber optics, a quadruply clad fiber is a single-mode optical fiber that has four claddings. Each cladding has a refractive index lower than that of the core.

FC Male to LC Female Hybrid Fiber Optic Converter Adapter + LC

Combo hybrid fiber adapters include FC Male-LC Female converter and LC Female-SC Male flange for cross-type fiber connection Precision ceramic alignment sleeves ensure low insertion loss, stable

Fiber Optic Cables | Fiber Patch Cables | Patch Cords,

Fiber Patch Cables, Multimode & Singlemode Duplex Fiber Optic Cables, Secure Order Fiber Patch Cords, Preferred Mil. Edu. Gov. Pricing, Same Day Shipping
