Features of Nordic Stainless Steel Cable Trays

Overview

We offer the market''s widest range of wire trays. With stainless steel wire trays in stock and custom solutions, we can always meet your unique needs.

Key Takeaways

Nordic Stainless Steel Cable Trays are high-quality, corrosion-resistant wire trays designed for industrial and harsh environments, offering customizable dimensions, long bracket spacing, and compliance with IEC 61537.

Material and Durability

Nordic stainless steel cable trays are made from first-class stainless steel, providing excellent resistance to corrosion, salt, and pollution, making them ideal for offshore facilities, wastewater treatment plants, and other harsh environments. The trays are designed for long-term durability and can withstand mechanical stresses without compromising safety.

Dimensions and Customization

Length: Standard trays are typically 3000 mm, but custom lengths are available. Width: Ranges from 25 mm to 600 mm. Height: Ranges from 25 mm to 125 mm.

Bracket Spacing: X-Tray cable trays feature the longest spacing between support brackets in the market, reducing the number of parts and installation time. Custom Solutions: Nordic Wire Tray can customize trays to meet specific project requirements, including bending, cutting, and shaping for unique installations.

Design Features

Open or perforated designs allow for proper ventilation and reduce the risk of overheating. Cable-friendly construction with rounded edges protects cables and tubes from damage. Lockable trays provide easy access for cleaning and maintenance while keeping cables secure.

Compact and heavy-duty options are available depending on cable load and width requirements.

Installation and Compliance

Fast and easy installation using minimal tools (M8 bolts, bolt cutters, and a 13 mm wrench) reduces labor costs. Compliance with IEC 61537 ensures the trays meet international standards for cable management systems. Flexible and modular system allows for future expansion or modification of cable routes.

Surface Treatments

Stainless steel trays are available in various surface treatments, including zinc-plated black for corrosion classification C1. These treatments enhance durability and suitability for environments with high humidity, salt, or chemical exposure.

Applications

Nordic stainless steel cable trays are suitable for: Industrial plants and factoriesOffshore and marine installationsWastewater treatment facilitiesEnvironments with high pollution or corrosive conditions These trays provide a premium, long-lasting solution for safe and organized cable management, combining strength, flexibility, and ease of installation.
