Fiber Optic 86 Panel Dual Position

Overview

Upgrade your network with the Stsben 86 type fiber optic panel. Available in SC and LC single or dual port configurations, this white panel offers a reliable connection for your fiber optic needs.

Key Takeaways

The 86 Fiber Optic Panel Dual Position is a dual-port, wall-mounted fiber optic panel designed for organized, efficient, and secure fiber termination and distribution.

Design and Structure

The 86-type dual-port fiber optic panel features a front and back double-panel design with rounded corners, allowing the optical fiber adapters and panels to be installed at a 45-degree angle for easier cable management and reduced stress on fibers. It comes with single and double port options, maintaining a uniform style across installations, and includes identification paper and covers for convenient labeling and maintenance. The panel is designed to avoid exposed fixing screw holes, enhancing both aesthetics and safety.

Material and Quality

These panels are manufactured by reputable companies such as Kolorapus and Fibconet, which comply with CCC, RoHS, CE certifications and provide quality management system certifications like ISO9001. The panels are made to withstand standard operational conditions and are suitable for FTTH (Fiber to the Home) and enterprise network applications.

Applications

The 86 dual-port fiber optic panels are widely used in large-scale engineering projects, including banks, schools, government buildings, hotels, and commercial buildings. They are compatible with PLC splitters, fiber patch cords, adapters, and connectors, making them ideal for structured cabling systems and fiber distribution networks.

Installation and Maintenance

The dual-position design allows for efficient cable routing and easy access during installation or maintenance. The identification covers help technicians quickly identify ports, reducing downtime and errors during network management. These panels are suitable for wall-mounted or rack-mounted setups, depending on the network layout.

Summary

The 86 Fiber Optic Panel Dual Position is a versatile, high-quality solution for fiber optic termination and distribution, offering dual-port connectivity, organized cable management, and easy maintenance, making it suitable for both residential and commercial fiber optic networks.
