P trays are non-conductive, corrosion-resistant, and provide excellent airflow, making them suitable for industrial, data center, and electrical infrastructure projects.

P

T Mitra Nusa Internasional (MNITray) Mitra Nusa manufactures and distributes cable trays and ladders with industrial-grade quality and fire-resistant finishes. Their products are processed with Hot Dip Galvanized (HDG) coatings for corrosion protection and are available in various materials and sizes. They provide nationwide delivery across Indonesia, ensuring timely supply for large-scale infrastructure projects.

Product Types and Features

Metal Cable Trays: Steel or aluminum trays with fireproof coatings, suitable for heavy-duty industrial applications. FRP/GRP Cable Trays: Flame-retardant, lightweight, corrosion-resistant, and non-conductive, ideal for chemical plants, coastal areas, and high-humidity environments. Ladder and Wiremesh Trays: Open designs for ventilation and heat dissipation, supporting large cable bundles while maintaining fire safety standards.

Considerations for Fireproof Cable Trays

Material Selection: FRP trays offer flame retardancy and corrosion resistance, while metal trays can be coated for fireproofing. Certifications: Look for ISO 9001, ISO 14001, OHSAS 18001, or SNI compliance to ensure safety and quality. Project Requirements: Choose trays based on load capacity, environmental conditions, and cable type.

These suppliers provide comprehensive solutions for fireproof cable management in Indonesia, supporting both industrial and commercial infrastructure projects with certified, durable, and safe products.
