H3c3 Layer Core Switch

Overview

It is a second-generation smart managed switch designed for network environments that require high performance, high port density, and easy installation. H3C S5120V3-LI Ethernet switch provides 10/100/1000Base-T adaptive Ethernet ports or SFP/SFP+ optical ports. The following information uses an example to describe the basic procedure for configuring a small-sized campus network. The S5560X or S6520X Ethernet switches series. H3C S5120V3-LI Ethernet switch product is independently developed by New H3C Technologies Co. Tailored to meet the needs of contemporary enterprise. S5800-60C-PWR Layer 3 Switch features two front-facing expansion slots that can dramatically increase the 10 Gigabit Ethernet or Gigabit Ethernet port density for even greater deployment flexibility and investment protection. The S5800-60C-PWR Layer 3 Switch is a new type of switch called a Flex. Hardware-based routing using features like MultiLayer Switching (MLS) for inter-VLAN routing. Express Forwarding mode when line cards are not available for Cisco Express Forwarding switching or when you need to use features not compatible with distributed Cisco Express Forwarding switching.
