HT300E Microcomputer Relay Protection Tester

Overview

This instrument features standard four-phase voltage and three-phase current output,capable of testing traditional relays and protection devices as well as modern microcomputer protections. It is produced by referring to Technical Condition for “DL/T624-2010” Microcomputer Relay & Protection Test Device issued by the original Power Department, extensively. Protection relay tester which offers all the characteristics and functions needed for protective relay testing, in a manual or automatic mode, designed for maximum efficiency, flexibility and simplicity, with the required accuracy and performance to test any kind and type of relays in all.
Test-330 three phase microcomputer protection relay test equipment is the highly efficient relay tester of our company. The six-phase electric protection. The universal relay testing solution ARTES 600 is the compact and universal solution for testing all types of protection relays. Because of the built-in control panel.

Three Phase Relay Protection Microcomputer Test System Test-330 three phase microcomputer protection relay test system is the highly efficient relay test equipment of GFUVE company. It is

Protection Relay Tester

Smart Multi-phase Relay Protection Tester is a new generation of intelligent relay protection test equipment for Substation ABB, Siemens, SEL, Schneider, NR

TEST-330 THREE PHASE MICROCOMPUTER PROTECTION

Test-330 three phase microcomputer protection relay test equipment is the highly efficient relay tester of our company.

HD-300E microcomputer relay protection tester1

The six-phase electric protection tester can output 120V per phase voltage, 30A per phase current, and 180A in parallel with six-phase current. The instrument uses high-performance industrial computer as

Protection relay testing device, Protection relay test

The power operation department uses microcomputer relay protection testers to regularly calibrate and maintain the protection devices in the power system.

LND-802 Microcomputer Relay Protection Tester

It can test not only various traditional relays and protection devices, but also various modern microcomputer protections, especially for transformer differential

3 Phase Microcomputer Protection Relay Test Device

The tester can not only test traditional relays and protective devices, but also test modern microcomputer-based protective devices, especially the differential

Protection relay testing and diagnostic solutions

Verify that your protection relays operate correctly when faults occur. Megger''s smart relay testing solutions and expert support help you validate

Microcomputer Relay Protection Testers

A microcomputer relay protection tester is an advanced diagnostic instrument used in electrical power systems to calibrate, verify, and ensure the reliability of protection relay devices.

6 Phase Relay Tester, Microcomputer Control | sisco

Intelligent 6 Phase relay tester is equipped with WindowsXP interface, ultra-thin industrial keyboard and optical mouse. This 6 phase relay protection set with

HT-802 3 Phases Relay&Protection Tester

DC test module provides special DC voltage and current output,mainly satisfying the requirements of doing tests including DC voltage relay, time relay and auxiliary relay.

What is a microcomputer relay protection tester and its significance?

The microcomputer relay protection tester can manually or automatically test various types of voltage, current, frequency, power, impedance, harmonics, differential, synchronous relays, etc.

Protection Relay Test Set

UHV-802 Protection Relay Test Set Special instrument for microcomputer relay protection test of microcomputer industrial control machine Classic Windows XP operation interface, user-friendly,

What Is a Microcomputer Protection Relay Tester and How Does

A microcomputer protection relay tester verifies the performance of digital relays by simulating fault conditions and measuring relay responses with high precision. HV Hipot Electric''s

HT-1200 Protection Relay Test Set

HT - 1200 Microcomputer relay protection tester is in reference to DL/T624-1997 issued by the ministry of the type of Microcomputer relay protection test device technical conditions, on the basis of widely
