How much does a low-voltage cable management rack cost

Overview

Browse professional cable runway systems designed for organized cable management. Explore wall brackets, straight sections, and mounting solutions.

Key Takeaways

Low-voltage cable management racks typically range from $50 to $400 or more, depending on size, style, and features.

Price Overview

Horizontal Rackmount Cable Managers: These are generally more affordable and suitable for stacking in high-volume or enterprise environments. Prices typically start around $50–$100 for basic models and can go up to $200 for larger or premium versions with enhanced cable routing features. Vertical Cable Management Racks: Designed for front and back access in server racks, these are often used in smaller networks or IDF locations.

Prices usually range from $150 to $400, depending on height (e.g., 45U), double-sided design, and additional features like finger ducts or covers for cable concealment. Specialty Systems (e.g., RackPack or SmartWire solutions): These integrated systems, which include reels, carts, and labor-saving features, can be more expensive but reduce installation time and labor costs. Pricing varies widely and may exceed $400 per unit depending on configuration.

Factors Affecting Cost

Rack Size and Height: Taller racks (e.g., 45U) or double-sided vertical managers cost more due to increased material and capacity. Material and Build Quality: Steel or reinforced racks with vented covers or cable guides are more durable and slightly higher in price. Features: Additional features like adjustable mounting depth, airflow optimization, or integrated labeling systems can increase cost.

Supplier and Shipping: Prices vary by vendor, and some suppliers offer fast shipping or bulk discounts, which can affect the final cost.

Where to Buy

Discount Low Voltage: Offers a wide selection of horizontal and vertical racks with fast shipping and competitive pricing. ShowMeCables: Provides floor- and wall-mounted racks, low-voltage cable management, and accessories with same-day shipping. Low Voltage Supply: Specializes in vertical cable managers for 4-post racks, suitable for server rooms and IDF locations.

Windy City Wire: Offers integrated RackPack systems for efficient low-voltage cable management, ideal for professional installations. Investing in the right cable management rack now can save time and reduce maintenance costs in the long term, especially in environments with frequent moves, adds, or changes.
