Industrial Level 3 Independent Dedicated Distribution Box

Overview

Electrical Distribution Boxes for Power Distribution | WielandElectrical distribution boxes for modular power distribution and installation. Flexible distr.

Key Takeaways

An Industrial Level 3 Independent Dedicated Distribution Box is a modular, high-protection electrical enclosure designed for industrial environments, offering IP65/IK08 ratings, robust materials, and flexible installation for decentralized power distribution.

Key Features

Protection Ratings: Typically rated IP65 for dust and water resistance and IK08 for impact protection, making them suitable for harsh industrial environments. Modularity: Often designed with 3 modules or more, allowing for flexible installation of circuit breakers, relays, and other control devices. Materials: Constructed from high-strength ABS, polycarbonate, or stainless steel, providing durability, chemical resistance, and impact protection.

Mounting Options: Can be wall-mounted or free-standing, with quick-fastening screws or hinged doors for easy access and maintenance. Electrical Compatibility: Supports single-phase or three-phase systems, with options for high-current connections (16A–125A) and integration with RCDs, MCBs, or RCBOs for circuit protection. Decentralized Installation: Designed for independent, dedicated distribution, allowing electronics to be installed close to the load, reducing wiring complexity and improving energy efficiency.

Standards Compliance: Manufactured in accordance with IEC 61439 and other relevant industrial standards, ensuring safety, reliability, and CE marking where applicable.

Applications

Industrial Machinery: Powering and controlling motors, welding equipment, and automated systems. Commercial and Event Power Distribution: Temporary or permanent setups for workshops, events, or construction sites. Smart Building Integration: Can house automation devices, sensors, and signal distribution for energy-efficient building management.

Harsh Environments: Suitable for areas with moisture, dust, or mechanical impact due to robust enclosure design.

Advantages

Safety and Reliability: High IP/IK ratings protect internal components from environmental hazards. Ease of Maintenance: Quick-access doors and modular design simplify installation and servicing. Flexibility: Can be customized with pre-assembled components, labeling, and circuit protection devices to meet project-specific requirements.

Energy Efficiency: Supports decentralized distribution, reducing energy losses and enabling smart building readiness. Industrial Level 3 Independent Dedicated Distribution Boxes are ideal for high-demand industrial applications where durability, modularity, and compliance with safety standards are critical. They provide a reliable solution for both power and signal distribution in challenging environments.

Industrial distribution box 3 modules Ref. 1303. IP65, IK08, 85 x 155 x 100 mm. Quick-fastening stainless-steel screws. Ideal for industrial environments.

ABB I Sub distribution boards

Depending on your specific application, our range of sub distribution boards includes solutions with mounting plates and DIN-rails with generous wiring space on both sides and behind the DIN rails.

Industrial Distribution Box | IP67 Power Enclosure

Industrial Distribution Box features a rugged IP67-rated enclosure for superior protection. Constructed with high-grade galvanized steel to ensure maximum

Industrial distribution and automation boards and modular boxes

The industrial distribution and automation boards and modular boxes are made of resistant materials, such as Palazzoli thermosetting resin, which make them suitable for use in any type of environment.

Industrial IP65 Distribution Boxes | Solera

Engineered from robust materials and designed for surface mounting, these enclosures deliver strong resistance to dust, humidity and water jets, making them ideal for both indoor and outdoor use in

Decentralized automation – Economical solutions

The portfolio includes both the enclosure and individual components for the configuration of individual functional units as well as ready-made solutions for power distribution, decentralized power

Distribution Box: Types and Functions | Axis-Electricals

A distribution box ensures that electrical supply is distributed in the building, also known as a distribution board, panel board, breaker panel, or electric panel.

Distribution box | OBO

Protection rating IK code 16 products (16 Variants) 30 60 90 Item no. 2008840 Distribution box, 3 division units, with terminal strip, polycarbonate To product Item no. 2008844 Distribution box, 5

Decentralized Building Automation Distribution Boxes (MSR)

Distribution boxes for building automation. Pluggable system solutions for energy-efficient smart buildings with flexible and fast electrical installation.

Industrial Socket Box Solution – Safe & Reliable Power
