Is a network cabinet width of 450mm sufficient

Overview

Learn how to select the right Network Cabinet size based on rack units, depth, airflow, and future expansion needs.

Key Takeaways

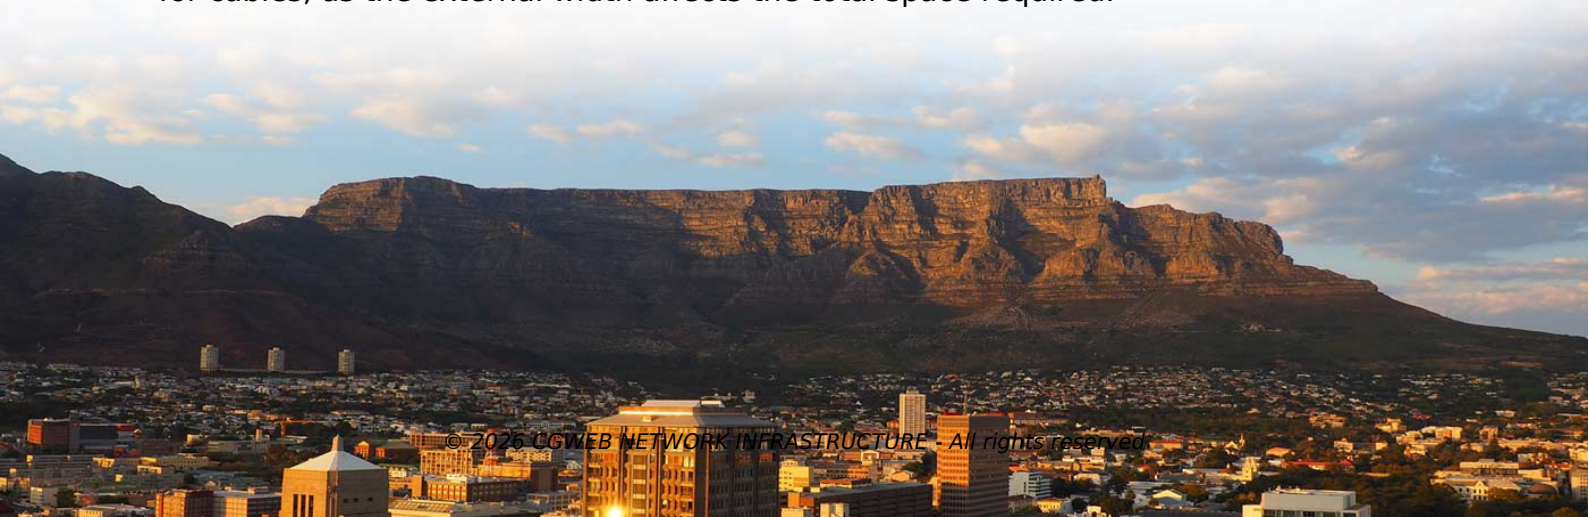

The external width of a typical 450mm deep network cabinet ranges from 540mm to 600mm, depending on the manufacturer and model. Detailed DimensionsAll-Rack 6U Wall Mount Cabinet: External width is 565mm, with a usable depth of 300mm and external depth of 450mm. Intellinet 6U Wall Mount Cabinet: External width is 600mm, height 370mm, depth 450mm.

Giganet 6U Wall Mount Cabinet: Width is 600mm, depth 450mm.

Standard Considerations

Most 450mm deep cabinets are designed to house 19-inch rack-mount equipment, which has an internal width of 482. 6mm. The extra external width (540–600mm) allows for cabling, side access, and ventilation.

When planning installation, consider door swing, side panel removal, and clearance for cables, as the external width affects the total space required.

Summary

While the internal rack width is standardized at 19 inches (482. 6mm), the external width of a 450mm deep network cabinet typically falls between 540mm and 600mm, depending on the specific model and manufacturer. This ensures compatibility with standard equipment while providing sufficient space for cabling and maintenance.
