Jordanian optical cable splicing manufacturer

Overview

Fibertech Jordan's Leading Fiber NetworkThe leading wholesale provider of fiber infrastructure services for internet service providers in Jordan, enabling.

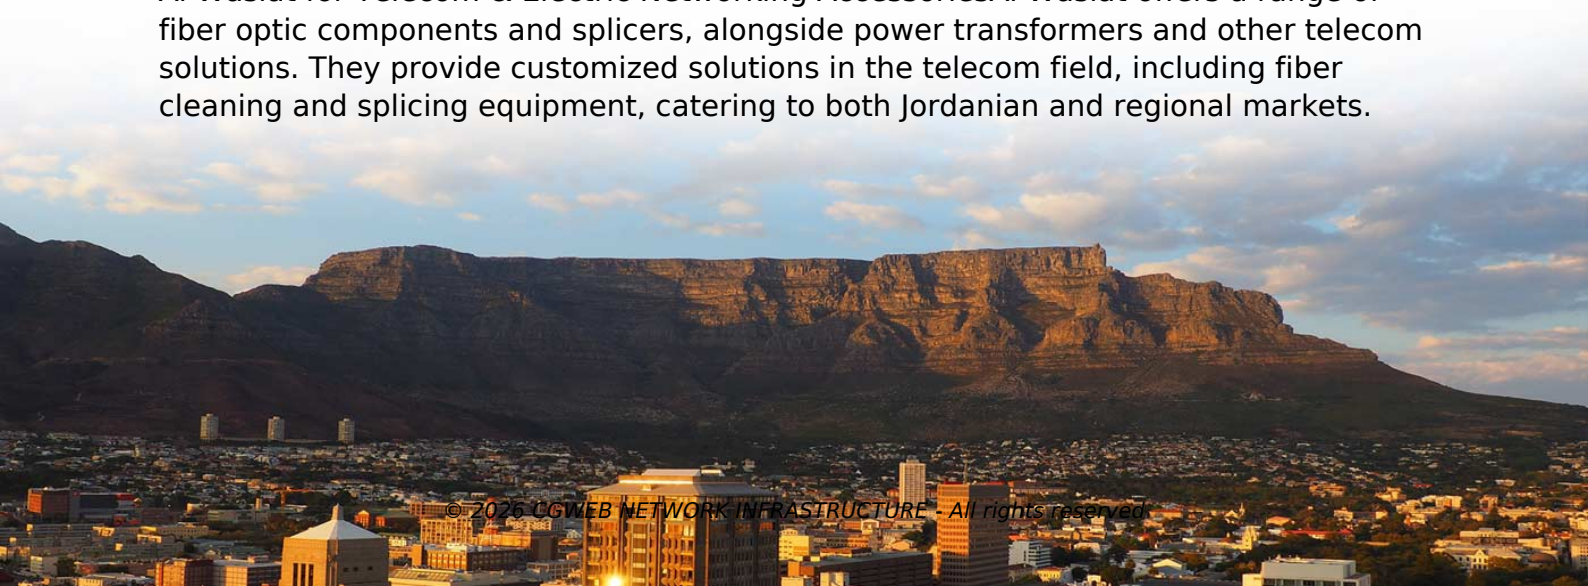

Key Takeaways

Yanar Tech, Al Waslat, and Techline are key Jordanian companies providing optical cable splicing equipment and fiber optic solutions.

Yanar Tech

Yanar Tech is a leading fiber optics technology provider in Jordan, specializing in cable placement, splicing, testing, and troubleshooting for both underground and overhead telecommunications networks. They handle fiber optic cable installation in power and communication infrastructures, including outdoor optical fiber cabinets. Their services ensure proper handling of cables, maintaining minimum bend radius and maximum tensile loading, and they provide ongoing maintenance and emergency repair support.

Al Waslat for Telecom & Electric Networking AccessoriesAl Waslat offers a range of fiber optic components and splicers, alongside power transformers and other telecom solutions. They provide customized solutions in the telecom field, including fiber cleaning and splicing equipment, catering to both Jordanian and regional markets.

Techline

Techline manufactures a complete range of fiber optic passive equipment, including joint closures, enclosure boxes, distribution boxes, and indoor/outdoor fiber cables. Their products are designed for easy installation with a plug-and-play approach and can be customized to meet client specifications. Techline has over 10 years of experience in the MENA region, providing high-quality fiber optic and networking products.

Additional Options

Other companies like Fibertech and Arrow for Engineering Solutions focus on fiber network services and telecom solutions, which may include splicing and installation support, though they are more service-oriented than manufacturing-focused. These companies collectively provide a robust ecosystem for fiber optic splicing, installation, and maintenance in Jordan, offering both equipment and technical expertise for telecom infrastructure projects.
