Leibo Channel Cable Tray

Overview

SEPO-Leitungen is a company with many years of experience in the manufacturing and distribution of high-quality cables and accessories for a variety of applications.

Key Takeaways

Leibo Channel Cable Trays are high-quality cable management systems designed for industrial and commercial applications, available in steel and grid configurations.

Overview

Leibo cable trays are engineered to organize, support, and protect electrical and instrumentation cables in various industrial, commercial, and infrastructure projects. They are part of a broader category of cable management systems that include solid, ventilated, and grid-style trays, providing flexibility for different installation requirements.

Types of Leibo Cable Trays

Steel Cable Trays: Made from durable steel, these trays offer high load-bearing capacity and are suitable for heavy-duty applications. They are often used in environments where mechanical protection of cables is critical. Grid Cable Trays: These trays feature a mesh or open-grid design, allowing for better ventilation and heat dissipation.

They are ideal for installations where airflow is important, such as data centers or electrical rooms.

Materials and Construction

Leibo trays are typically fabricated from corrosion-resistant metals, including low-carbon steel, stainless steel, or aluminum alloys. Some trays may also have protective finishes like zinc or epoxy coatings to enhance durability in harsh environments. The choice of material depends on factors such as corrosion resistance, electrical safety, and cost considerations.

Features and Accessories

Ventilated or solid bottoms: Ventilated trays allow heat dissipation and easier cable access, while solid trays provide maximum protection. Fittings and bends: Trays can be customized with horizontal or vertical bends, tees, and reducers to navigate complex layouts. Cable securing: Slots for cable ties or Ty-Rap fasteners are provided to maintain proper spacing and organization.

Custom sizes: Widths and lengths can be tailored to accommodate the number and size of cables, ensuring efficient use of space.

Applications

Leibo channel cable trays are widely used in: Industrial plants and factoriesCommercial buildings and office complexesData centers and IT infrastructureInstrumentation and control systemsEnergy and utility installationsSuppliersLeibo cable trays are available through B2B suppliers in Germany, including distributors specializing in steel and grid cable trays. Companies like Eurotray and KabelScheune.de provide a range of Leibo products for direct purchase or project-specific inquiries. Leibo trays are valued for their durability, flexibility, and compliance with industrial standards, making them a reliable choice for structured cable management in demanding environments.
