Lithuanian Cable Tray Manufacturer Factory

Overview

Thanks to innovation and improved technology, we have evolved into a one-stop shop for Cable Tray manufacturers.

Key Takeaways

Lithuania's cable tray production is primarily served by companies such as Voltum, Lietkabelis, and Kabelita, which manufacture and supply cable trays, ducts, and related electrical installation systems.

Key Manufacturers

Voltum is a Lithuanian company providing complete electrical installation services across Europe, including the supply and installation of tray and ladder systems, conduits, and cable pulling solutions. They operate with in-house teams and maintain their own transport fleet, enabling large-scale industrial and commercial projects, including cable tray installations up to 7 km in length. Lietkabelis, founded in 1958 in Panevezys, is one of Lithuania's oldest and most established cable producers.

While originally focused on enamelled wires and low-voltage power cables, the company has expanded into automotive cable harnesses and industrial cabling solutions, and holds certifications such as ISO 9001 and BASEC for compliance with European standards. Lietkabelis is a significant player in the Lithuanian cable market and contributes to the production of cable trays and related electrical infrastructure. Kabelita, established in 1991, produces electricity cables and supplies HDPE technical pipes, which are often used in cable tray and duct systems.

The company serves both wholesale and retail markets in Lithuania and abroad, providing materials for building and industrial projects.

Market Overview

The Lithuanian cable trays and ducts market is structured with several key players, including the companies mentioned above. Production in Lithuania covers a range of products such as metal and plastic cable trays, conduits, and ducts, supporting both domestic and European projects. The market has shown steady growth over the past five years, driven by industrial expansion, construction projects, and increasing demand for structured cabling systems.

Production Capabilities

Lithuanian manufacturers are capable of producing large volumes of cable trays and ducts, with integrated services including installation, testing, and certification. Companies like Voltum provide turnkey solutions, combining production with on-site assembly, while Lietkabelis focuses on high-quality cable manufacturing and harness assembly. Kabelita complements the market with technical pipes and electrical materials for infrastructure projects.

Conclusion

Lithuania hosts a robust cable tray production sector, with Voltum, Lietkabelis, and Kabelita as the main sources of production. These companies provide a combination of manufacturing, supply, and installation services, meeting both local and European demand for cable trays, ducts, and associated electrical systems.
