# Low loss of ODN products

## Overview

All components must meet IEC 61300 requirements for low insertion loss, stable return loss, and mechanical durability. You deploy an ODN in the following scenarios: 1. FTTH Residential High-density neighborhood networks with 1:32 or 1:64 split ratios. FTTB / MDU BuildingsFirst generation ODNs (ODN1) were spliced together using highly skilled technicians and expensive fusion splicing machines which needed a controlled environment, usually a van, to keep dust and other contaminants away. While expensive and time consuming, this practice resulted in low-loss optical. The residential optical distribution network (ODN) is the final connection between a telecom operators' internet, cable, and telephone services and its customers. Over the past decade, and often out of the spotlight, ODNs have played a critical role in the widespread adoption and deployment of. Use ZION's Fiber Optic Link Loss Budget Calculator to estimate fiber attenuation, connector loss, splice loss, MPO/MTP loss, PLC splitter loss and remaining optical margin for FTTH, ODN, PON, data center and fiber cabling projects. He is focusing on the main challenges met by telecom and media players, FTTx strategies, regulatory management, telecom-media convergence challenges, new services business. This passive layer is known as the Optical Distribution Network (ODN).
