

Maltese supplier of compatible SFP SD-WAN equipment

Overview

Many suppliers of compatible SFPs offer customised solutions to meet the specific needs of businesses, allowing you to select the exact modules you need for your network infrastructure.

Key Takeaways

Fibconet, Fiberroad, HoweVision, and IDS in Malta offer compatible SFP modules suitable for SD-WAN deployments.

Local Suppliers and Offerings

Fibconet provides a range of fiber optic SFP modules, including small form-factor pluggable transceivers for various network applications, suitable for connecting SD-WAN appliances to fiber networks (Fibconet). Fiberroad offers 155M to 4G SFP transceivers, including SR, LR, ER, ZR, CWDM/DWDM, and BIDI series. These modules are MSA-compliant, support hot-swapping, and are compatible with multiple network protocols such as Ethernet, Fibre Channel, and ATM/SONET, making them suitable for SD-WAN infrastructure (Fiberroad).

Howe

Vision supplies 1000Base SFP optical transceivers compatible with most switches and routers. Their modules support Gigabit Ethernet and Fibre Channel, conform to SFP MSA standards, and can be used with SD-WAN devices requiring flexible connectivity (HoweVision).

IDS

S (Inter Data Systems) specializes in compatible SFPs that are vendor-agnostic, supporting brands like Cisco, Aruba, Juniper, Fortinet, and MikroTik.

ID

S modules cover transmission rates from 1 Gbps to 100 Gbps, distances up to 80 km, and various connector types, providing flexibility for SD-WAN deployments in corporate or data center environments (IDS). Considerations for SD-WAN

Deployments When selecting SFP modules for SD-WAN equipment, ensure:

Compatibility with your SD-WAN appliance brand (e.g., Fortinet, Aruba EdgeConnect, VMWare SASE). Transmission speed and distance requirements match your network design.

Hot-swappable capability to maintain uptime during module replacement. Vendor support and warranty, especially for third-party compatible SFPs. By sourcing from these Maltese suppliers, you can obtain cost-effective, compatible SFP modules that integrate seamlessly with SD-WAN solutions while maintaining network reliability and scalability.
