Middle East cable tray installation price

Overview

Cable Tray System in Saudi Arabia | Heavy Duty Cable Trays SupplierEfficient and organized cable management is essential in modern infrastructure, whether.

Key Takeaways

Cable tray installation in the Middle East typically ranges from $25 to $80 per meter, depending on tray type, material, and project complexity.

Price Overview

The cost of cable tray installation in the Middle East varies widely based on several factors: Type of Cable Tray: Ladder trays, perforated trays, and channel trays differ in cost. Ladder trays are generally more expensive due to their heavy-duty design, while channel or perforated trays are more economical for light-duty applications. Material: Aluminum, mill-galvanized steel, hot-dipped galvanized steel, stainless steel (304/316), and epoxy-coated trays have different price points.

Stainless steel and epoxy-coated trays are at the higher end due to corrosion resistance and durability. Project Scope: Large industrial or commercial projects with long spans, complex routing, or high load requirements increase labor and material costs. Installation Complexity: Costs rise with the need for custom fabrication, trapeze supports, or integration with HVAC and electrical systems.
