Namibian Waterproof Electrical Distribution Box Dimensions Diagram

Overview

EKDB10 Distribution Box | IP65 Plastic WaterproDiscover EKDB10 IP65 waterproof distribution boxes made of durable PC plastic. Available in 4-39 ways, singl.

Key Takeaways

Waterproof electrical distribution boxes in Namibia typically follow IP65/IP66 standards, with dimensions varying by module count and configuration, suitable for wall or embedded mounting.

Typical Dimensions and Configurations

Waterproof distribution boxes are available in various module capacities, commonly ranging from 4 to 54 modules, with single, double, or triple layers depending on the application. Standard dimensions for a mid-sized 12–24 module box are approximately: Height: 300–600 mmWidth: 200–400 mmDepth: 120–200 mm Larger industrial boxes, such as those used in photovoltaic or commercial installations, can exceed 1000 mm in height and 500 mm in width, with deeper enclosures to accommodate multiple DIN rails and circuit breakers.

Material and Protection

Housing: ABS or polycarbonate (PC) plastic, halogen-free, UV-resistant for outdoor use Door: Transparent PC cover for monitoring internal componentsIngress Protection: IP65–IP66, ensuring dust-tight and water-resistant performanceImpact Resistance: IK09, protecting against physical damageTemperature Range: -25°C to +80°C, suitable for harsh outdoor environments Internal LayoutDIN Rail Mounting: Standard TH35x7. 5 rails for modular breakersCircuit Configuration: 4–36 channels, each controlled by a circuit breakerKnockout Holes: Top and bottom for flexible wiring entryLayering: Single, double, or triple layers for separation of live and neutral circuits Mounting OptionsWall-Mounted: External flange with slots for screwsEmbedded: Internal flange for flush installationDual-Door Design: Separates live parts from non-live parts for safety during maintenance Diagram OverviewA typical waterproof distribution box diagram includes: Front View: Transparent door, module slots, and labeling areaSide View: Depth showing DIN rail placement and cable entry knockoutsTop/Bottom View: Knockout positions for wiringInternal Layout: Arrangement of DIN rails, circuit breakers, and grounding terminals These diagrams are usually provided by manufacturers like ETEK, SinoBreaker, IDE Electric, and Selhot Electric and can be requested for specific module counts or custom configurations.

For Namibian installations, ensure the box meets IEC 60529 standards for IP rating and is suitable for outdoor exposure to sun, dust, and occasional rain. Custom sizes and pre-assembled solutions are available for larger or specialized projects.
