Network rack temperature-controlled silent cooling unit

Overview

An intelligent fan system designed for cooling audio video, DJ, server, network, and IT equipment racks. Protects rack-mount equipment from overheating, performance issues, and shortened lifespans. Features a thermal controller with intelligent programming that will automatically adjust rack fan speeds in response to changing temperatures. PROCOOL SP480X is a silent Temperature controlled high airflow rackmount fan system. Available in both intake and exhaust versions. The Intake model SP480X blows air into. This NavePoint 42U 2-fan cooling unit easily mounts on your standard 19" racks and cabinets to provide optimal air utilization that protects against overheating and supports the performance of your equipment. Avoid disruption in your workspace with this cooling units quiet 43db-A to 47db-A. Check each product page for other buying options. Higher data transfer speeds, low latency, and constant availability require more computing power, which in turn means higher power densities per rack.
