North Macedonia Intelligent Cold Aisle 1000mm Depth

Overview

Cool Shield™ containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing power consumption.

Key Takeaways

Intelligent Cold Aisle Containment systems with 1000mm depth optimize data center cooling by isolating cold air to server intakes, improving efficiency, and supporting modular, scalable deployment.

Overview

Cold Aisle Containment (CAC) systems are designed to prevent the mixing of cold supply air with hot exhaust air, ensuring that servers receive consistent cooling directly at their intakes. A 1000mm depth is a common specification that accommodates standard server racks while maintaining optimal airflow and energy efficiency.

Key Features

Airflow Optimization: CAC systems direct cold air precisely to server racks, reducing hot spots and improving CRAC/CRAH unit efficiency. Modular and Scalable Design: Systems can be floor-standing or ceiling-suspended, allowing easy expansion or reconfiguration as data center needs grow. Intelligent Monitoring: Advanced systems include temperature, humidity, and airflow sensors, enabling real-time monitoring and automated adjustments to maintain optimal conditions.

High-

Quality Materials: Panels are typically made of steel or tempered glass, providing durability and visibility into the aisle. Energy Efficiency: By isolating cold aisles, these systems reduce energy consumption and improve cooling predictability. Installation and CustomizationEnd-of-Aisle Doors: Sliding or double doors synchronize to allow easy access while maintaining containment.

Cable Management: Integrated trays and pathways ensure organized power and network cabling without disrupting airflow. Custom Dimensions: While 1000mm depth is standard, many providers offer bespoke solutions to fit unique rack layouts or room constraints.

Suppliers in North Macedonia

Schneider Electric: Offers NetShelter Aisle Containment systems with intelligent monitoring and modular design suitable for local deployment.

ED

P Europe: Provides bespoke CAC solutions with synchronized sliding doors, modular panels, and global support for installation. Kaltgang Warmgang / IDEEN: Specializes in steel enclosures for cold aisle containment, emphasizing energy efficiency and flexibility. Maysteel Industries: Offers custom-engineered cold aisle containment with end-of-row doors, top panels, and integrated airflow management.

Benefits

Improved Cooling Efficiency: Reduces energy costs by preventing hot and cold air mixing. Enhanced Equipment Reliability: Maintains consistent temperature and humidity for sensitive IT equipment. Scalability: Supports future expansion without major infrastructure changes.

Operational Flexibility: Modular design allows quick reconfiguration and maintenance access. For North Macedonia, these systems can be sourced from local distributors or through regional offices of global providers, ensuring compliance with local standards and support for installation and maintenance.

North Macedonia Intelligent Cold Aisle IP54 Installation Solution

A comprehensive eficiency management platform that combines cold aisle containment with intelligent environmental controls can deliver greater than 30 percent energy savings and 25 percent capacity

Hot & Cold Aisle Containment Systems For Data Centers by Cool Shield

Cool Shield™ containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing power consumption.

DATA CENTER NEXPAND

Aisle containment is the solution to the challenges which data centers have been presented with since day one: the optimisation of cooling and energy-eficiency through the separation of hot and cold

Data center containment

Using aisle containment and airflow management solutions can significantly reduce your cooling costs. Minkels offers data center managers different future-proof solutions with the most flexibility and

Aisle Containment Solutions | Maysteel Industries

DAMAC''s cold aisle containment systems are a great fit for high-density data centers. This solution caps cold air at the tops of cabinets and across the aisles,

Aisle Containment | Bespoke Aisle Containment

Design, manufacture and install of bespoke aisle containment systems for use in retrofit, new build and hyperscale projects. Aisle containment is a recognised

Hot and Cold Aisle Containment Solutions Ardmac

Get expert hot and cold aisle containment solutions for your data centres with Ardmac. Our tailored approach maximises efficiency.

FOCUSED COOLING USING COLD AISLE CONTAINMENT

Cold aisle containment can be used with or without conventional raised floor cooling. It is easily retrofitted into existing raised floor data centers and works in tandem with the raised floor as well as

Aisle Containment Systems From EDP Europe | Data

© 2026 CGWEB NETWORK INFRASTRUCTURE - All rights reserved

With five global manufacturing and processing locations, and our own installation teams, EDP ensures a quick turnaround on hot or cold aisle containment

Aisle Containment

To achieve further efficiency improvements, a data center should be designed as aisle containment, separating warm from cold air. By using the SCHROFF standard containment system in combination

FusionModule2000 Smart Modular Data Center V500R002C03 Product ...

The FusionModule2000 smart modular data center solution (FusionModule2000 for short) includes smart modules A and B. This document describes the FusionModule2000 product

Video Surveillance Integration Systems in North Macedonia

Macro Solutions for Industrial Infrastructure Our factory-direct solutions for North Macedonia encompass a wide array of specialized equipment designed for the harshest industrial environments. From Cold
