Odf patch panel series products

Overview

Rack-mount, wall-mount, and sliding patch panels for high-density fiber management — 12 to 288 ports. A fiber optic patch panel — also called an Optical Distribution Frame (ODF) — is the backbone of any structured fiber cabling system. Streamline your fiber connectivity with our premium Fiber Optic Patch Panels and ODF systems. It provides a centralized termination point where incoming. Achieve successful cable management, handle high amounts of fiber cable and add density to fiber frames with the new DCX Optical Distribution Frame (ODF) System which features innovations like flippable cassettes, modular frame design and multiple configuration options. YingFeng provides a complete range of fiber ODF solutions, including rack mount ODF, wall mount ODF, 19-inch.
