Palestine Power Cable Tray Model List

Overview

Country Duty PhotonicsWe offer Cable Tray in Palestine in different specifications at competitive market prices. Our range is customized and passes stringe.

Key Takeaways

In Palestine, cable trays are available in various models including ladder trays, perforated trays, and channel trays, made from materials like galvanized steel, stainless steel, and fiberglass.

Common Cable Tray Models in Palestine

Ladder Cable Trays

Designed for heavy-duty power cables and long cable runs. Features side rails with rungs for structural support. Available in multiple sizes and rung spacing to accommodate different cable loads.

Materials: Galvanized steel, stainless steel, aluminum, and fiberglass. Applications: Industrial plants, commercial buildings, and power distribution systems.

Perforated Cable Trays

Solid base with perforations for airflow and heat dissipation. Ideal for medium to light cable loads. Enhances cooling and prevents cable overheating.

Materials: Galvanized steel, stainless steel, and fiberglass. Channel or Strut TraysU-shaped or C-shaped trays for supporting smaller cable bundles. Often used in combination with wall brackets or trapeze supports.

Materials: Aluminum, galvanized steel, and stainless steel. Cable Ladders with Box RungsBox-shaped rungs welded for extra strength and reduced side rail rotation. Suitable for high-load applications like power plants and industrial sites.

Standard rung spacing: 150mm, 225mm, 300mm; Load depths: 75mm to 150mm.

Materials and Features

Galvanized Steel: Corrosion-resistant, widely used for indoor and outdoor installations. Stainless Steel (304 & 316L): High durability, suitable for harsh environments. Fiberglass: Lightweight, non-conductive, and resistant to chemicals.

Aluminum Alloy: Lightweight and corrosion-resistant, ideal for suspended installations. Modular design allows easy installation, maintenance, and future expansion. Open-frame designs improve accessibility and airflow, reducing overheating risks.

Applications

Power distribution in commercial and industrial buildings. Electrical infrastructure in hospitals, schools, and government facilities. Oil, gas, and desalination plants requiring robust cable support systems.

Integration with bus ducts, transformers, and electrical panels for organized cable management. For procurement, Brilltech Engineers and other local suppliers in Palestine provide a range of customizable cable tray models with installation support, ensuring compliance with safety and industry standards.
