Papua New Guinea Guangyu Bridge

Overview

Technically, this is a bridge: it's a structure which spans a gorge. The only difference is, the bridge can't be used by humans due to the fact that its purpose is to support 2 pipelines - 1 gas, 1 oil - across the extremely high gap in Papua New Guinea. The Connect PNG Program is a transformative infrastructure initiative aimed at revitalizing Papua New Guinea's road and bridge networks to drive socioeconomic development. Below are the key components of the ongoing projects under this ambitious program 1. These maps showcase the scope and progress of our initiatives across the nation National Road Network Map: Visualize PNG's primary highways and critical economic corridors under the. The Bougainville Island is located on the east side of the Papua New Guinea Main Island, and also the biggest island in the Solomon Islands. The. Papua New Guinea (PNG) is an emerging tech society with an opportunity to overcome geographic and social boundaries, in order to engage with the global market. Press reporting, business literature, social media, video data, and open imagery suggest Beijing's interest in widening.
