Price List for Fireproof Enclosed Cable Trays

Overview

Price List Cable Tray 2024 - Free download as PDF File (.pdf), Text File (.txt) or view presentation slides online.

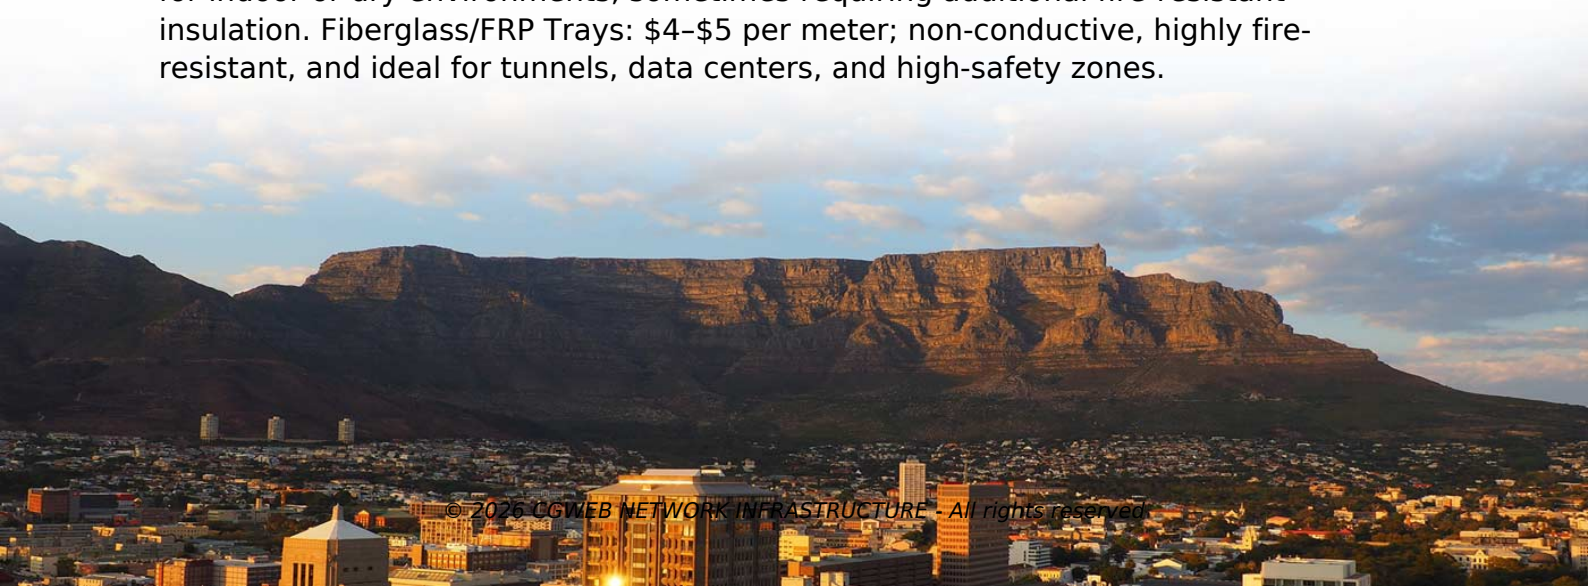

Key Takeaways

Enclosed fireproof cable trays typically range from $1. 50 to $20 per meter or piece, depending on material, fire rating, and design.

Pricing Overview

The cost of enclosed fireproof cable trays varies widely based on material, fire resistance, and structural design: Galvanized Steel Trays: $1. 50–$5 per meter; often coated with fireproofing materials for 90–120 minutes of fire resistance, suitable for industrial plants and commercial buildings. Stainless Steel Trays: $20 per meter; inherently corrosion-resistant and fireproof, ideal for chemical plants, marine environments, and critical infrastructure.

Aluminum Trays: $2–$18. 50 per meter; lightweight and corrosion-resistant, suitable for indoor or dry environments, sometimes requiring additional fire-resistant insulation. Fiberglass/FRP Trays: $4–$5 per meter; non-conductive, highly fire-resistant, and ideal for tunnels, data centers, and high-safety zones.

High-

End or Specialized Systems: Enclosures with intumescent coatings, ventilated designs, or blast-rated protection can cost $27–$101 per meter or more, depending on fire rating and complexity.

Factors Affecting Price

Material Composition: Steel, stainless steel, aluminum, and FRP have different fire resistance, durability, and weight, influencing cost. Fire Rating: Trays rated for 2–4 hours of fire protection are more expensive due to additional coatings or specialized construction. Design and Configuration: Ladder, perforated, solid-bottom, or channel trays vary in material usage and manufacturing complexity, affecting price.

Installation Requirements: Custom sizes, long-span supports, or integrated ventilation systems can increase costs. Quantity and Supplier: Bulk orders often reduce per-meter cost, while specialized suppliers or imported products may be higher.

Typical Applications

Industrial and Commercial Buildings: Galvanized steel or aluminum trays for power and control wiring. Data Centers and Power Plants: Solid-bottom aluminum or FRP trays for fire and thermal protection. Chemical, Marine, and Offshore Facilities: Stainless steel or FRP trays for corrosion resistance and high fire safety.

Life-

Safety Systems: Enclosures with 2–4 hour fire ratings for emergency power, alarms, and critical infrastructure. In summary, enclosed fireproof cable trays are priced according to material, fire rating, and design complexity, with standard industrial trays starting around $1. 50–$5 per meter and high-performance or specialized systems reaching $20–$100 per meter.
