Price of African Busbar Expansion Joints

Overview

Busbars BUSBAR SPACER KIT FOR 20mm BAR List Price R 351.80 EXCL. VAT SAVED: R 0.00 EXCL. VAT Net Price R 351.80 EXCL. VAT R 404.57 INCL. VAT Expansion Join.

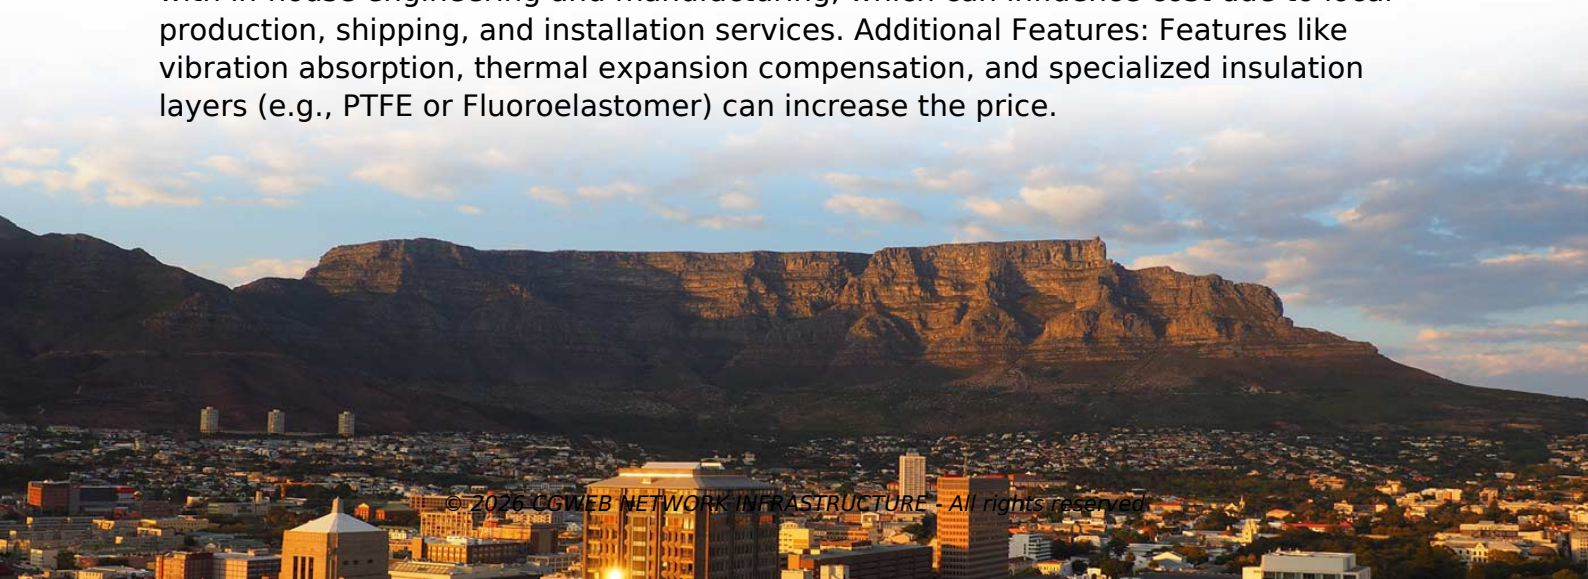

Key Takeaways

The price of custom-made busbar expansion joints in Africa varies widely depending on specifications, materials, and supplier, typically requiring a direct quote from manufacturers.

Factors Affecting Price

Material and Construction: Busbar expansion joints can be made from copper, aluminum, or stainless steel, often with insulating layers or flexible connectors. High-quality metals and specialized coatings for corrosion resistance or high-temperature operation increase costs. Customization and Size: Custom dimensions, shapes, and electrical ratings significantly affect pricing.

Larger or more complex joints designed for high-voltage or high-current applications are more expensive. Supplier and Location: African suppliers such as Mega Flexibles & Busbars (South Africa) and SA Busbar (Johannesburg) provide tailored solutions with in-house engineering and manufacturing, which can influence cost due to local production, shipping, and installation services. Additional Features: Features like vibration absorption, thermal expansion compensation, and specialized insulation layers (e.g., PTFE or Fluoroelastomer) can increase the price.

Typical Procurement Approach

Request a Quote: Most suppliers do not list fixed prices for custom-made busbar expansion joints. You need to provide specifications such as current rating, voltage, dimensions, and environmental conditions to receive an accurate quote. Engineering Consultation: Suppliers often offer in-house engineering support to design joints that meet operational requirements, which may be included in the cost or billed separately.

Turnaround Time: Custom manufacturing may affect price depending on urgency and complexity.

Recommendation

To obtain a precise price, contact African suppliers directly: Mega Flexibles & Busbars (SA): Offers custom-manufactured busbar solutions with tailored specifications.

S

A Busbar / POLYBAR: Provides complete in-house engineering and manufacturing for specialized components. Sizonke Group and Sanspar: Supply expansion joints with various materials and designs suitable for industrial applications. By providing detailed specifications, you can receive a custom quote reflecting the exact cost for your project.

Prices can range from a few hundred to several thousand USD per joint depending on complexity and materials.
