Price of European-style enclosed cable trays

Overview

Cable trays Cable trays Discover a comprehensive range of high-quality cable trays and cable ladders at ekabel24.com – the reliable choice for safe, organi.

Key Takeaways

European-style enclosed cable trays typically cost between $10 and $50 per meter, depending on material, coating, and size. Price Range by Material and CoatingGalvanized Steel (Pre-Galvanized or Hot-Dip Galvanized): $10–$30 per meter. Pre-galvanized is cheaper but less durable outdoors, while hot-dip galvanized (HDG) offers better corrosion resistance for industrial or outdoor use.

Aluminum: $20–$50 per meter. Lightweight and rust-proof, suitable for installations where weight is a concern. Stainless Steel: Higher-end pricing, often above $50 per meter, used in highly corrosive or hygienic environments like food processing or coastal areas.

Plastic or Halogen-

Free Trays: Budget-friendly, typically below $20 per meter, but not suitable for heavy loads or high-temperature applications.

Additional Cost Considerations

Fittings and Accessories: Bends, tees, reducers, brackets, and end caps can add 20–30% to the total cost of the tray system. Labour and Installation: Skilled installation, supports, and hangers contribute significantly to the overall project cost, sometimes exceeding the material cost. Size and Load Capacity: Wider or taller trays designed for heavy power cables are more expensive than smaller trays for light cabling.

Bulk Orders: Purchasing in larger quantities can reduce the per-meter cost, while custom sizes or coatings may increase it.

Summary

For a standard European-style enclosed cable tray system, expect $10–$30 per meter for steel, $20–$50 per meter for aluminum, and higher for stainless steel. Including fittings, supports, and installation, the total project cost can increase by 20–50% over the base tray price. Choosing the right material and coating depends on environmental conditions, load requirements, and longevity expectations.
