Price of High-End Fireproof Cable Trays

Overview

Fireproof cable tray available for wholesale, starting at $0.32 to $12. Minimum order quantity is 10 units. Hot dip galvanized, custom perforated, and anodized options.

Key Takeaways

High-strength fireproof cable trays typically range from $50 to $300 per meter, depending on material, fire rating, and load capacity.

Price Range and Factors

The cost of fireproof cable trays varies widely based on material, design, and fire resistance rating. Common materials include galvanized steel, stainless steel, aluminum, and FRP (fiber-reinforced plastic). Stainless steel and high-strength galvanized steel trays are generally more expensive due to superior fire and corrosion resistance.

Typical price ranges are: Standard galvanized steel trays: $50–$120 per meterStainless steel or high-strength trays: $150–$300 per meterSpecialized fireproof or mineral-insulated (MI) trays: $200–$350 per meter Additional factors influencing price include tray width, load capacity, ladder vs. mesh design, and fire rating (e.g., E60, E90, or UL 1724 certification),. Trays with higher fire ratings or intumescent coatings that expand under heat are more costly but provide enhanced protection for critical installations. Applications and ConsiderationsHigh-strength fireproof trays are used in industrial, commercial, and utility installations, including data centers, tunnels, oil and gas facilities, and power plants.

They ensure mechanical support, fire containment, and circuit integrity during fire events. When selecting a tray, consider: Compliance with local and international fire standards (UL, BS, DIN, IEC)Load capacity exceeding cable weight with a safety marginLow smoke and halogen-free (LSZH) materials for enclosed public spacesSupplier reliability and warranty for long-term performance Purchasing OptionsSuppliers like Alibaba, Accio, and Meka Pro offer a range of fireproof cable trays with customizable options, including length, width, material, and surface treatment. Bulk orders or industrial-scale projects may reduce per-meter costs, while specialized high-strength or high-fire-rating trays command premium pricing.

In summary, expect to pay $50–$300 per meter for high-strength fireproof cable trays, with the final cost influenced by material, fire rating, load capacity, and supplier specifications.
