Price of Network Metal Distribution Cabinets

Overview

How Much Does a Precision Power Distribution Cabinet So, how much does a precision power distribution cabinet cost?

The final price depends on rated curren.

Key Takeaways

Network metal distribution cabinets typically range from £150 to over £1,000 depending on size, features, and brand.

Overview

Network metal distribution cabinets, also known as server or patch cabinets, are 19-inch metal enclosures designed to house servers, switches, routers, and other network devices securely and efficiently. They come in various sizes, from small wall-mounted units to large floor-standing racks, and may include features like ventilated doors, lockable panels, adjustable mounting rails, and integrated power distribution units.

Price Range

Small wall-mounted cabinets: Approximately £150–£300, suitable for home offices or small network setups. Medium floor-standing cabinets (12U–24U): Typically £300–£600, offering more space for multiple devices and better airflow. Large server racks (42U and above): Can cost £700–£1,200+, often including advanced features like soundproofing, temperature control, or extra depth for high-density equipment.

Prices vary based on brand, material quality, ventilation, security features, and included accessories such as shelves, cable management, or PDUs.

Additional Considerations

Customization: Some suppliers, like EDP Europe, offer custom cabinets tailored to specific IT or edge computing needs, which may increase cost. Delivery and assembly: Many UK suppliers, including Cable Monkey and CMW, provide next-day delivery or free shipping for orders over a certain amount, which can affect overall cost. Color and finish: Cabinets are commonly available in black or white, and premium finishes may slightly increase the price.

For precise pricing, it is recommended to check supplier websites or request a quote based on your required cabinet size, features, and quantity.
