Price of pigtail connector

Overview

Amazon.com: Pigtail Wire ConnectorContains at least 50% recycled material. Global Recycled Standard (GRS) certified products contain recycled content that.

Key Takeaways

Pigtail connectors typically cost between $0. 50 and $5 per piece, depending on type, material, and quantity.

Typical Retail Prices

Small electrical or LED pigtail connectors sold in packs (e.g., 10–20 pieces) generally range from $5 to $15 per pack on platforms like Amazon, which equates to roughly $0. 50–$1 per connector for basic low-voltage applications. Specialized connectors for data, audio, or video applications may cost more, often $2–$5 per piece, depending on the brand and specifications.

Bulk or industrial-grade connectors from suppliers like Mouser or McMaster-Carr can vary widely, with prices influenced by material (copper, aluminum, or plated metals), amperage rating, and connector type.

Installation Context

If you are considering pigtailing aluminum wiring in a home, the cost is significantly higher because it includes labor, materials, and potential panel upgrades. Typical retrofitting costs range from $2,000 to $6,000 for a standard home, with a per-outlet estimate of $100–$350 for copper pigtails and connectors. This is separate from the individual connector cost and reflects professional installation.

Summary

For most DIY or small-scale projects, expect to pay under $5 per connector, with bulk packs offering better value. For full home wiring retrofits, the total cost is dominated by labor and materials rather than the connector itself. Always check specifications to ensure compatibility with your wiring type and voltage requirements.
