Price quote for gigabit optical modules in Kyrgyzstan

Overview

Best Fiber Optic Modules in Kyrgyzstan | Buy Bulk Fiber Optic Customize MOQ of Fiber Optic Modules manufacturer from Kyrgyzstan, deal with top Fiber Optic.

Key Takeaways

Gigabit optical modules in Kyrgyzstan typically range from $20 to $50 per module, depending on type, brand, and supplier.

Overview of Pricing

The cost of gigabit SFP optical modules varies based on whether they are single-mode or multimode, the transmission distance, and the brand. For example, Gigabit Multimode SFP 1000Base-SX LC Fiber Modules operating at 850nm with distances up to 550 meters are available in Kyrgyzstan through online retailers like Desertcart, with prices generally around $25–$40 per module for individual units or slightly lower per unit when purchased in packs of four. Suppliers and MarketplacesTradeKey Kyrgyzstan offers a variety of fiber optic modules, including SFP transceivers for Fast Ethernet and SDH/SONET applications, though specific prices are often provided upon inquiry.

AEDHS.com supplies major brands and provides door-to-door delivery across Kyrgyzstan, including cities like Bishkek, Osh, and Jalal-Abad. Prices may vary depending on the brand and module specifications, and bulk orders may receive discounts. Qoovee Market lists fiber optic equipment in bulk from local and international suppliers, allowing buyers to compare prices and negotiate for wholesale purchases.

Factors Affecting Price

Module Type: Single-mode modules (longer distance) are generally more expensive than multimode modules. Brand and Quality: Well-known brands like FLUKE, Keysight, or Molex may cost more than generic modules. Quantity: Bulk purchases often reduce the per-unit cost.

Delivery and Import Fees: Some suppliers include duty-paid delivery, which can affect the final price.

Practical Advice

For short-range connections (up to 550m), multimode SFP modules are cost-effective and widely available. For long-distance or high-performance networks, single-mode modules with DFB lasers may cost more but provide better reliability. Always check compatibility with your networking equipment before purchasing, as some modules may only work with specific switch brands or models.

In summary, expect to pay between $20 and $50 per gigabit optical module in Kyrgyzstan, with prices influenced by type, brand, and supplier. Bulk orders and local suppliers like AEDHS.com or marketplaces like Qoovee can offer competitive pricing and delivery options.
