Resetting DHCP on Huijue Core Switch

Overview

Run the reset ip pool { interface pool-name | name ip-pool-name } { start-ip-address [end-ip-address] | all | conflict | expired | used } command to reset the configured IP address pool on the device. The Dynamic Host Configuration Protocol (DHCP) uses the client/server mode to dynamically configure and uniformly manage network parameters for users. Firstly, open the Command Prompt with administrative privileges by right-clicking on the Start menu and selecting “Command Prompt. Below are the dhcp configs for the core switch. "Service DHCP" is enabled. These are dummy IP addresses, and the core switch is providing dhcp, so I would not need to use the "dns server" command would I?

07-04-2019 03:47 AM. Server configuration enables the server to send network parameters to the client, client configuration determines how clients request network parameters, and relay agent configuration enables a relay agent to forward DHCP messages between clients and servers that are on different physical subnets. □□ Learn How to Configure DHCP & Relay Agent on Huawei Switch! □□ Are you struggling to set up DHCP and Relay Agent on your Huawei switch?

In this tutorial, I'll walk y □□ Learn How to Configure DHCP & Relay Agent on Huawei Switch! □□ Are you struggling to set up DHCP and Relay Agent on your Huawei.
