SC interface fiber optic adapter

Overview

An SC/APC fiber optic adapter is a passive mechanical interface used to join two SC connectors that have angled physical contact (APC) ferrules, typically polished at 8°. If you work with single-mode optical networks—FTTH, PON, CATV, 5G fronthaul—you will run into the SC/APC fiber optic adapter (sometimes called an SC/APC coupler) almost immediately. This connector landscape reflects how modern SFP deployments prioritize port density and. SC fiber optic adapters with integrated panel retention clips are TIA/EIA-604 FOCIS-3 compliant. With their square shape and push-pull design, SC adapters facilitate easy insertion and removal while maintaining precise fiber core alignment to minimize signal. AMM offers LSH/E-2000 adapters in different variations.
