Six-wavelength optical power meter drop-proof model

Overview

This optical power meter offers a dynamic range up to 80 dB, self-calibrates across six wavelengths, and features a large backlit display for easy use.

UT692G Optical Power Meters

The UT692 series handheld optical power meters are used to measure absolute optical power or relative loss of optical power through length of fiber optic wires. UT692 series are designed to be durable, the

Optical Power Meters

Our benchtop optical power and energy meters are plug and play compatible with our wide range of calibrated optical sensors for the highly accurate and repeatable optical measurements required in

OMM-6810B-240V Power and Wavelength Meter

The OMM-6810B-240V is the only power meter capable of measuring the optical power and wavelength of semiconductor lasers including short wavelength lasers, high power pumps, and fiber lasers. A

The ST800K Optical Power Meter can test optical power

The ST800K Optical Power Meter can test optical power within the range of 800~1700nm wave length. There are six kinds of wavelength calibration points:
