# Steel Trough Cable Tray 400 Price Quote

## Overview

The cost of metal cable tray 400 is influenced by several factors, including the material used, the type and size of the trays, and the complexity of the installation.

## Key Takeaways

The price of a 400mm galvanized steel trough cable tray typically ranges from $2 to $25 per meter, depending on material, coating, supplier, and order quantity.

### Pricing Overview

The cost of a 400mm steel trough cable tray depends on several factors: material type, surface treatment, tray width, thickness, and supplier margins. Galvanized steel is the most common choice, balancing durability and cost, while hot-dip galvanization (HDG) provides superior corrosion resistance for outdoor or high-humidity environments, which can increase the price slightly. Stainless steel options are more expensive but offer long-term durability.

For bulk orders or large projects, prices can be significantly lower due to volume discounts, sometimes reducing costs by 20%–40%. Importing from regions like China may also reduce costs by 30%–50% for factory-direct purchases.

### Supplier Options

Alibaba and other verified suppliers offer 400mm galvanized steel cable trays suitable for indoor and outdoor use, with bulk order options available.

### Made-in-

China provides OEM and factory-direct options, allowing customization to meet specific load capacities and environmental requirements. Accio highlights industrial-grade galvanized steel trough trays with fire resistance, UL 870 compliance, and modular designs for faster installation, with some suppliers offering rates as low as $0. 76 per meter for large-scale industrial projects.

### Cost Considerations

Tray Type: Ladder trays are more expensive but support heavier cables; perforated or wire mesh trays are cheaper for lighter loads. Installation: Labor, equipment, and shipping costs can add to the total project cost. Customization: Prefabricated or modular designs may increase upfront costs but reduce installation time and long-term maintenance.

How to Request a QuoteTo obtain an accurate price quote for your project: Specify tray width (400mm), length, and material (galvanized steel or HDG). Indicate quantity and whether bulk discounts are required. Include installation environment (indoor, outdoor, corrosive conditions).

Contact suppliers directly via Alibaba, Made-in-China, or industrial distributors to receive tailored quotations within 24 hours. By providing these details, suppliers can offer competitive pricing and suggest the most suitable tray type for your project.
