Three-layer rear long-line distribution box

Overview

Introducing the TriLine C enclosures, designed to seamlessly align with the TwinLine range and effortlessly accommodate CombiLine N modules. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. a Applicable for type LWPQ only. From power and signal distribution to I&C applications and complete room solutions - we have just what you need. Our solutions enable short planning and realization times and allow optimized. Global Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each stage of the supply chain, from the source to the final product and meet social, environmental, and chemical requirements.
