UAE Cable Tray Installation Price List

Overview

Cable tray pricing in UAE depends on several important factors including material type, tray dimensions, coating finish, load capacity, project environment, and installation requirements.

Key Takeaways

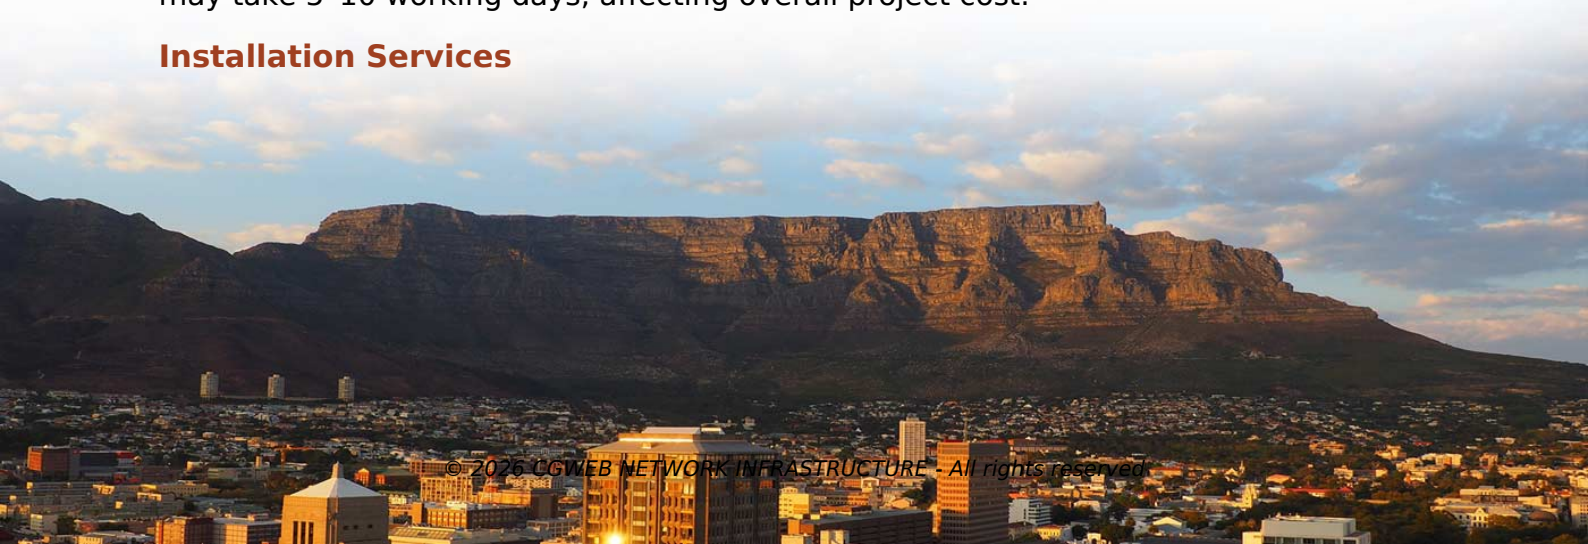

Cable tray installation for factories in the UAE typically ranges from AED 150 to AED 400 per meter, depending on material, size, and project complexity.

Factors Affecting Price

Material Type: Galvanized iron (GI) trays are the most economical, while hot-dip galvanized (HDG) and stainless steel trays cost more due to superior corrosion resistance and industrial durability. Tray Dimensions and Load Capacity: Wider, thicker, or heavy-duty ladder trays designed for industrial use increase both material and installation costs. Coating and Finish: Powder-coated or corrosion-resistant finishes add to the price, especially for outdoor or harsh factory environments.

Project Complexity: Custom bends, supports, and connectors, as well as installation in high ceilings or congested areas, can increase labor costs. Quantity and Lead Time: Bulk orders or standard sizes are often available ex-stock, while custom fabrication may take 5–10 working days, affecting overall project cost.

Installation Services
