

Which are the major new energy internet companies

Overview

Uncover the key utility providers in New York City, from electricity to internet, and learn how to optimize your services for better living—read on.

Key Takeaways

The new energy internet sector includes startups like 2GG, Leap, Bandora Systems, Covert Science, and RESYNC, as well as major technology platforms from SAP, Cisco, ABB, Microsoft, and Sungrow. Key Startups in the Internet of EnergySeveral emerging companies are driving innovation in distributed energy management and smart grid solutions: 2GG (Slovenia): Offers Smart-Metering-as-a-Service (SMaaS) with analytics software to optimize energy consumption, forecast demand, and prevent leakage for utilities and industrial users. Leap: Focuses on distributed energy resource (DER) management and energy optimization.

Bandora Systems: Develops IoT-enabled energy monitoring and control solutions. Covert Science: Provides advanced energy analytics and predictive maintenance tools.

RESYN

C: Specializes in real-time energy balancing and grid efficiency solutions. These startups leverage machine-to-machine communication, smart meters, and cloud-based analytics to enhance energy efficiency and reliability.

Major Technology Platforms

Established technology companies are also heavily involved in the sector, providing platforms for energy management, EV charging, and IoT integration: SAP E-Mobility: Monitors and optimizes EV charging, load balancing, and energy flow for fleets and public transit networks.

Cisco Energy

Wise: Enables organizations to monitor, control, and optimize energy consumption across connected devices.

AB

B: Offers industrial automation and smart grid solutions for energy efficiency.

Microsoft: Provides cloud-based energy management and AI-driven analytics for utilities.

Sungrow: Develops renewable energy inverters and smart energy solutions.

Additional Players in Energy IoTThe Internet of Things in energy also includes companies that integrate sensors, analytics, and connectivity to improve energy efficiency and grid management. These companies are recognized as leaders in the IoT energy market.

Summary

The new energy internet sector is a mix of innovative startups and established technology platforms. Startups like 2GG and RESYNC focus on smart metering, DER management, and predictive analytics, while major corporations such as SAP, Cisco, ABB, and Microsoft provide scalable platforms for energy optimization, EV charging, and IoT integration. Together, these companies are shaping a more efficient, digital, and distributed energy ecosystem.
